Mathematics and Mathematical Literacy Exemplar Examination Papers and Memorandums for Grades 10 to 12 (NCS)

This guide has been developed for the Department of Education and Old Mutual by a team of Mathematics and Mathematical Literacy teachers. The project was co-ordinated by Brombacher and Associates.

© 2007 Department of Education

The Department of Education has received many requests for examples of examinations for Grade 10, 11 and 12 Mathematics and Mathematical Literacy. This book is a response to those requests.

The Department of Education wishes to thank Old Mutual for their generous support for this project.

The Department would also like to thank the South African teachers and subject advisors who contributed to this valuable resource for our teachers.

MATHEMATICS AND MATHEMATICAL LITERACY

EXEMPLAR EXAMINATION PAPERS AND MEMORANDUMS

FOR

GRADES 10 TO 12 (NCS)

ABOUT THIS BOOKLET

The examination papers in this booklet are exemplar end-of-year examination papers. These papers have been developed by teachers of Mathematics and Mathematical Literacy in line with the requirements for the examinations as set out in the following documents:

- Subject Assessment Guideline: Mathematics (DoE, January 2007)
- Subject Assessment Guideline: Mathematical Literacy (DoE, January 2007)

All of the papers are based on the Core Assessment Standards for the subjects as detailed in the Subject Assessment Guideline Documents.

In developing the booklet the team of teachers have used the following as points of departure:

1. The lower-order questions asked for by the guidelines on examination setting in the Subject Assessment Guidelines should be clearly visible to students writing the examinations. You will find that:
 - Both of the Mathematics papers (paper 1 and Paper 2) have as Question 1 a collection of short knowledge and basic application questions covering the full curriculum – all students should as a minimum be able to answer all of these questions.
 - The Grade 11 and Grade 12 Mathematical Literacy Paper 1 have a clearly marked Section A which consists of the knowledge and basic application questions that all students should find accessible.
 - The early questions in the Grade 10 Mathematical Literacy examination paper are all knowledge and basic application questions.
2. The use of language in developing context – especially in Mathematical Literacy – should be kept to a minimum so that students do not spend more time reading than they do answering the examination questions.

The following have not been included in the booklet and teachers who use these papers in their teaching may need to develop and include these for the papers:

- Cover pages and instructions sheets
- Diagram sheets (if necessary)
- Formulae sheets

Although every effort has been taken to minimise errors, it is possible that there are some. If you are working with the booklet and happen to come across any errors then please write to the developers (aarnout@brombacher.co.za) so that we can rectify these for future editions.

It is hoped that you will find these papers useful as you prepare your students for examinations in Mathematics and Mathematical Literacy and also as you attempt to make sense of the curriculum statements for both subjects.

Grade 10 Mathematics: Question Paper 1**MARKS: 100****TIME: 2 hours****QUESTION 1**

1.1 Write $\frac{1}{11}$ as a decimal fraction. (1)

1.2 Without the use of a calculator and showing all working, determine between which two integers $\sqrt{39}$ lies. (2)

1.3 A set of numbers is represented on the number line below:

1.3.1 Use inequalities to describe the set of numbers. (2)

1.3.2 What is the smallest integer in this set of numbers? (1)

1.4 Factorise the following:

1.4.1 $x^2 - 3x$ (2)

1.4.2 $2x^2 - 5x - 3$ (2)

1.4.3 $x^2 - y - xy - 1$ (4)

1.4.4 $x^3 + 8$ (2)

1.5 Alongside is the graph of the function:

$$f(x) = a \sin x$$

1.5.1 What is the value of a ? (1)

1.5.2 What are the coordinates of A, the turning point of the function $f(x)$ shown on the graph? (2)

1.5.3 What is the period of $f(x)$? (1)

1.5.4 What will be the new equation of $g(x)$ if $g(x)$ is obtained by shifting $f(x)$ up 1 unit? (1)

[21]

QUESTION 2

2.1 Simplify the following:

2.1.1 $(x-2)^2(x+2)$ (3)

2.1.2 $\frac{x-3}{2} - \frac{2x+1}{5}$ (4)

2.1.3 $\frac{2^{x+1} \cdot 3^{2x-1}}{18^x}$ Answer must have positive indices only. (4)

2.2 Solve the following equations:

2.2.1 $(x+2)(x-3)=6$ (5)

2.2.2 $2^{2x+1}=32$ (3)

[19]**QUESTION 3**

3.1 The table below shows the Currency Cross Rates for 20/08/2007.

Currency	\$	R	€	£	¥
1 US (\$) =	1	7,3597	0,7412	0,5036	113,7100
1 Rand =	0,1359	1	0,1007	0,0684	15,4504
1 Euro(€) =	1,3492	9,9297	1	0,6795	153,4175
1 UK (£) =	1,9857	14,6142	1,4718	1	225,7939
1 Japan(¥) =	0,0088	0,06472	0,0065	0,0044	1

3.1.1 How many South African rand will you get for 1\$? (1)

3.1.2 If an item you chose to buy while in Paris cost €30, what factor would you multiply by to get an approximate cost in rand? (1)

3.1.3 Calculate how many Japanese Yen you would receive if you converted R600 to Yen? Answer to the nearest Yen. (2)

3.1.4 Calculate how many pounds you would receive if you converted R600 to pounds? (2)

3.2 R5 000 is invested for 3 years at 5,6% p.a. compound interest. The interest is compounded monthly. Calculate the amount earned at the end of the investment period.

(6)
[12]

QUESTION 4

Two businessmen, A and B, travel by car from their hometowns towards Johannesburg. Below is a graph showing the distance of their cars from Johannesburg and the time of day.

- 4.1 Who lives closer to Johannesburg A or B? Give a reason for your answer. (2)
- 4.2 Who drove faster A or B? Explain your answer in two different ways. (3)
- [5]**

QUESTION 5

- 5.1 Given the functions: $f(x) = -x^2 + 9$ and $g(x) = 6 - 2x$
- 5.1.1 Draw f and g on the same system of axes. Label all intercepts with the axes. (6)
- 5.1.2 Use your graph to determine for which values of x ; $f(x) \geq 0$ (2)
- 5.1.3 $f(x)$ is reflected in the x -axis. This reflection is given a new name $h(x)$. Draw $h(x)$ on the same system of axes as f and g . Make sure you have labeled each graph carefully. (2)
- 5.1.4 Give the equation of $h(x)$. (2)

- 5.2 The graphs of $f(x) = a^x$ and $g(x) = \frac{2}{x}$; $x > 0$ are represented in the diagram below. The line $y = x$ is also shown in the diagram

- 5.2.1 Determine the value of a in the equation $f(x) = a^x$. (2)
- 5.2.2 Determine the coordinates of B, the point of intersection of $g(x)$ and the line $y = x$ (2)
- 5.2.3 Determine the coordinates of C, the point of intersection of $f(x)$ and the y -axis. (2)
- 5.2.4 Determine the coordinates of D, the reflection of the point A in the $y = x$ line. (2)
- 5.2.5 What will the coordinates of A become if the graph of $f(x)$ is moved 2 units down. (2)
- 5.2.6 What is the range of $f(x)$? (1)

[23]

QUESTION 6

6.1 Solve for x by trial and error: $5^x = 80$ (to at least 1 decimal place) (3)

6.2 Matches are used to make the figures below.

6.2.1 Copy and complete the following table: (4)

Area	2	4	6	8	20	
Number of matches						207

6.2.2 Determine how many matches you will need if the area is $2n$. (2)
[9]

QUESTION 7

7.1 Use a calculator to calculate the following:

7.1.1 11×24

7.1.2 11×52

7.1.3 11×63

(1)

7.2 Explain in words any pattern that you notice. (A conjecture) (3)

7.3 Check if your conjecture works for another 3 examples. (3)

7.4 Use algebra to prove your conjecture for multiplying eleven by a two digit number. (4)

[11]

– End of Paper –

Grade 10 Mathematics: Question Paper 2**MARKS: 100****TIME: 2 hours****QUESTION 1**

- 1.1 Give the co-ordinates of A' , the new co-ordinates of the point $A(-2; 5)$ if:
- 1.1.1 It is reflected about the x-axis (1)
 - 1.1.2 It is reflected about the y-axis (1)
 - 1.1.3 It is reflected about the line $y = x$ (2)

- 1.2 Given the points $A(-3; 2)$, $B(5; -1)$ and $C(2; p)$, calculate:
- 1.2.1 The length of the line segment AB. (2)
 - 1.2.2 The co-ordinates of M, the midpoint of the line segment AB. (2)
 - 1.2.3 The value of p if the gradient of BC is 2. (3)

- 1.3 In $\triangle ABC$ below, $\hat{C} = 53,14^\circ$ and $AC = 20$ metres.

- 1.3.1 Calculate the value of AB. (2)
 - 1.3.2 Hence, express BC in terms of $\tan 53,14^\circ$. (2)
- 1.4 The base of the rectangular prism below has a length 18 cm a breadth x cm. The height of the prism is 5 cm.

Calculate the following in terms of x :

- 1.4.1 The volume of the prism. (2)
 - 1.4.2 The new breadth of the prism, if the volume of the prism is doubled, but the length and the height remain the same. (1)
- 1.5 The ages of the people in the Jackson family are as follows:
63; 32; 34; 64; 32; 27; 35
- 1.5.1 Determine the mean. (2)
 - 1.5.2 Determine the mode. (1)
 - 1.5.3 Determine the median. (2)
 - 1.5.4 Determine the upper quartile. (2)

[25]

QUESTION 2

ΔABC has co-ordinates $A(-4; 2)$, $B(1; 2)$ and $C(-1; 6)$, and $AC = 5$ units

- 2.1 Determine the lengths of AB and BC (3)
- 2.2 What kind of triangle is ΔABC . Give a reason for your answer. (2)
- 2.3 Explain why ΔABC cannot be right angled. (5)
- 2.4 If D is the point $(x; y)$ such that $E(2\frac{1}{4}; 7)$ is the midpoint of CD . Determine the co-ordinates of D . (3)
- 2.5 Show that the quadrilateral $ABCD$ is a trapezium. (5)

[18]**QUESTION 3**

In the diagram below there are 4 triangles (labeled Δ 's 1 – 4) that are shaded in grey and 1 triangle (ΔABC) shaded in white.

- 3.1 Copy and complete the following statements by filling in a 1, 2, 3, or a 4:
 - 3.1.1 $\Delta \underline{\hspace{1cm}}$ is the reflection of $\Delta \underline{\hspace{1cm}}$ in the y -axis (and vice versa). (2)
 - 3.1.2 $\Delta \underline{\hspace{1cm}}$ is the reflection of $\Delta \underline{\hspace{1cm}}$ in the x -axis (and vice versa). (2)
 - 3.1.3 $\Delta \underline{\hspace{1cm}}$ is the reflection of $\Delta \underline{\hspace{1cm}}$ in the line $y = x$ (and vice versa). (2)
- 3.2 The white triangle, ΔABC , has co-ordinates $A(-3; 0)$, $B(-5; -1)$ and $C(-4; -4)$.
 - 3.2.1 Describe the transformation that has occurred from $\Delta 3$ to ΔABC . (2)
 - 3.2.2 If ΔABC is reflected along the line $y = x$, draw $\Delta A'B'C'$ on the grid provided and write down the co-ordinates of each point. (6)

[14]

QUESTION 4

A candle maker makes candles with a radius, r and a height, h referred to as Type A. See the diagram below.

The candle maker also makes two other types of candle: Type B and Type C.

- 4.1 Type B candles have the same radius and double the height of the Type A candle.

Express the volume of wax needed to make Type B candles in terms of the volume of wax needed to make Type A candles.

(2)

- 4.2 Type C candles have the same height and double the radius of the Type A candle.

Express the volume of wax needed to make Type C candles in terms of the volume of wax needed to make Type A candles.

(2)

- 4.3 What will be the impact on the height if he wants to make a candle with the same volume of wax as the Type A candle, but wants it to have half the radius.

(2)

- 4.4 The candles are transported by packing each candle into a rectangular box. Shown in the diagram above.

If the radius of a Type A candle is $2\frac{1}{2}$ cm and the height is 11cm, calculate the area of cardboard needed to make up boxes for the Type A candles.

(3)

[9]

QUESTION 5

The diagram below is a rough, un-scaled plan of the front structure of a house and garage.

- 5.1 Calculate the value of h . (4)
5.2 Calculate the pitch of the house roof (shown as θ on the diagram). (4)
5.3 Calculate the width of the house (shown as length AB on the diagram). (3)
5.4 What would be the impact on h if the pitch of the garage roof was changed to be 15° . Show your working. (4)

[15]

QUESTION 6

Skype is a free Voip (voice over internet protocol) solution which allows you to instant message or talk to people all over the world. Skype has experienced rapid growth since its launch in August 2003. The table below shows the “Real” Skype Users (approx 10% of those registered on skype) in 9 sub-regions.

Real Users: Sub-Regional				
Europe/Mid East/Africa	W. Europe	E. Europe/Mid East	Africa	Subtotal
	2,054,568	3,467,114	2,311,409	7,833,108
Americas (North/South)	USA	Canada	S. America	Subtotal
	2,801,348	916,817	4,706,325	8,424,525
Asia/ Pacific	Aus/NZ/Jap/Tal/S.Kor	China	India/Other	Subtotal
	1,760,401	2,112,482	1,267,489	5,140,372
Total “real” users				21,398,007

www.homepage.mac.com/hhbv/blog/skypegrowth/skypegrowth.html

- 6.1 Draw a pie chart to illustrate usage by sub-regions in the “Asia/Pacific” region. (5)
- 6.2 Calculate the number of degrees required to draw the “Africa” section of a pie chart showing all of the “Total real users”. (2)
- 6.3 Which sub-region makes up approximately $\frac{2}{9}$ of the “Total real users”? (2)
- 6.4 How much do people talk on skype for in a day? Below is a histogram showing results in a sample group of 150 university students and the number of words spoken by each on skype on one particular day.
(Please note that the information shown here is not official skype statistics and does not claim to be a true representation of the actual skype usage trends).

Skype usage in a sample of 150 university students

- 6.4.1 What is the range? (1)
- 6.4.2 What is the modal group? (1)
- 6.4.3 Which group contains the median value? (2)
- 6.4.4 Calculate the estimated mean? (Show all your calculations and give your answer to the nearest word). (5)

[19]

– End of Paper –

Grade 11 Mathematics: Question Paper 1

MARKS: 150
TIME: 3 hours

QUESTION 1

- 1.1 1.1.1 Which of the following numbers is non-real? $\sqrt{3}$ or $\sqrt{-9}$ (1)
- 1.1.2 Determine the value of a : $(x^{\frac{1}{2}})^{\frac{2}{3}} x^3 = x^a$ (2)
- 1.1.3 Simplify: $\sqrt{75} - \sqrt{48}$. Leave answer in surd form. (2)
- 1.1.4 Will the product of two irrational numbers always be irrational? Support your answer with an example. (3)
- 1.2 Find the 6th term of each of the following sequences
- 1.2.1 2; 5; 8; 11; ... (1)
- 1.2.2 64; 32; 16; 8; ... (1)
- 1.2.3 1; 4; 9; 16; ... (1)
- 1.3 Find: $30000 \times (1 - 0,3)^{10}$ (1)
- 1.4 Answer the following questions relating to the graphs below

- 1.4.1 Which function, $f(x)$ or $g(x)$, has the form $y = 3^x$? (1)
- 1.4.2 What are the roots of $f(x) = 0$? (2)
- 1.4.3 What is y-intercept of $g(x)$? (1)
- 1.4.4 What is the range of $g(x)$? (1)
- 1.4.5 Give the equation of the asymptote of $g(x)$. (2)
- 1.4.6 Give the equation of the axes of symmetry of $f(x)$. (1)

- 1.5 Answer the following questions relating to the graphs of:
 $y = \sin(x - 30^\circ)$ and $y = 0,5$.

- 1.5.1 Determine the co-ordinates of A, a maximum of the graph. (2)
 1.5.2 B, C, D and E are where the two graphs intersect. Given that $B(180^\circ; 0.5)$, find the coordinates of C, D and E. (6)
 1.5.3 What is the y-intercept of the sine graph? (1)
 1.5.4 What is the amplitude of the sine graph? (1)

- 1.6 Solve for x:

- 1.6.1 $\frac{x+2}{6} = \frac{1}{2}$ (2)
 1.6.2 $\frac{x^2-4}{2x-4} = 7$ (4)
 1.6.3 $x^2 + 2x - 15 = 0$ (4)
 1.6.4 $x^2 > 4$ (3)

[43]

QUESTION 2

2.1 Given the sequence:

Sequence	3	6	11	18	27	p
1 st difference		3	5	x	y	z
2 nd difference		2				

- 2.1.1 Determine the values of x and y . (2)
 2.1.2 Hence, or otherwise, predict the value of z . (1)
 2.1.3 Determine the value of p . (2)
 2.1.4 What do you notice about the 2nd differences? (2)
 2.1.5 Determine the 10th term of the sequence (4)

2.2 The Fibonacci sequence has $T_1 = 1$ and $T_2 = 1$. $T_3 = T_1 + T_2$; $T_4 = T_2 + T_3$; and $T_5 = T_3 + T_4$ and so on2.2.1 Find the 3rd, 4th and 5th terms (3)

2.2.2 In the picture below the two smallest squares each have sides of length 1 unit. What is the length of the side of the largest square? (2)

2.2.3 It is noted that:

$$T_1^2 + T_2^2 = T_3 \times T_2$$

$$T_1^2 + T_2^2 + T_3^2 = T_4 \times T_3$$

From this observation the conjecture is that:

$$T_1^2 + T_2^2 + T_3^2 + \dots + T_k^2 = T_{k+1} \times T_k$$

Is this conjecture correct if $k = 6$? You may use the diagram in 2.2.2 (5)**[21]**

QUESTION 3

- 3.1 You purchase a car for R100 000 and the depreciation rate will be 13% per annum on a reducing balance. Inflation is expected to be 8% per annum for the next 5 years.
- 3.1.1 In which year will your car lose the greatest value? (1)
- 3.1.2 What will the value of your car be after 5 years? (3)
- 3.1.3 What would the cost of a new car be in 5 years time? (3)
- 3.1.4 If you used your old car as a trade in 5 years time, how much more will you need to buy a similar new car? (1)
- 3.2 A bank offers two account options
- A) 14,5 % per annum simple interest?
- B) 14 % per annum compounded monthly?
- 3.2.1 You have R10 000 to invest for one year. Which option would be the best for you? Show your working. (4)
- 3.2.2 Would your choice be different if you were investing for 6 months? Show your working. (5)

[17]

QUESTION 4

The graphs of $f(x)$; $g(x)$ and $h(x)$ are drawn below:

4.1 Given $g(x) = x - 1$. Find the x -value such that $g(x) = 6$. (1)

4.2 $f(x) = -x^2 + 2x + 3$

4.2.1 Determine the roots of $f(x) = 0$. (3)

4.2.2 Find the equation of the axis of symmetry of $f(x)$. (2)

4.2.3 Find the co-ordinates of the turning point of $f(x)$. (2)

4.3 $h(x) = \frac{a}{x}$ and passes through the point (1; 4)

4.3.1 Determine the value of a . (1)

4.3.2 For which values of x are $h(x)$ decreasing as x is increasing? (2)

4.3.3 The graphs of $h(x)$ and $g(x)$ intersect at P. Determine the co-ordinates of P correct to 2 decimal places. (5)

4.3.4 Show that all three graphs are concurrent at P (2)

4.4 Determine the x -values for which $h(x) - g(x) > 0$ (4)

[22]

QUESTION 5

The graph of the function $f(x)$ is given below where $f(x) = 2x^2 + x - 6$

- 5.1 The x-coordinates of A and B are $x = -1,5$ and $x = 0,5$ respectively. Determine the y-coordinates of A and B. (2)
- 5.2 Determine the average gradient between A and B. (2)
- 5.3 For what values of x is $f(x)$ increasing? (3)
- 5.4 Use your graph to determine the coordinates of a point C, where the average gradient between A and C would be 0. (2)
- 5.5 Find the coordinates of a point D such that the average gradient between B and D is 5. (2)

[11]

QUESTION 6

A disease is killing off a population of fish in a dam at a rate of 10 % every 24 hours. The function $p(x) = A(1-i)^t$ where A is the initial population, i is the rate of decrease and t is the number of days that have passed.

The following data is collected by researchers:

Days after disease identified (t)	0	1	2	3
Fish Population	A	4500	4050	3645

- 6.1 Plot this information on a graph. (3)
- 6.2 Determine A the initial population of fish in the dam. (3)
- 6.3 After how many days will the population of fish be halved? Indicate your solution on your graph. (5)
- [11]**

QUESTION 7

- 7.1 Solve for x :

$$\frac{3}{x+2} - \frac{x+5}{x^2-4} = 3 \quad (6)$$

- 7.2 Solve simultaneously for x and y in the following system of equations:

$$x + y + 7 = 0 ; \text{ and}$$

$$x^2 + y^2 = 25 \quad (7)$$

[13]

QUESTION 8

Below is a feasible region for a linear programming problem.

- 8.1 Determine the system of inequalities that represent the above feasible region. (6)
- 8.2 Determine the maximum value of $P = x + y$ if P lies in the feasible region. (3)
- 8.3 For what values of k would $T = kx + y$ have a maximum at point B? (3)
- [12]**

– End of Paper –

Grade 11 Mathematics: Question Paper 2**MARKS: 150****TIME: 3 hours****QUESTION 1**

- 1.1 A triangle is drawn with vertices A (0;2) ; B (4;5) and C (4;-4).
 1.1.1 Find the length of AB. (2)
 1.1.2 Find the equation of the line through B and C. (1)
 1.1.3 Find the equation of the line through A and B. (2)
 1.1.4 Find the inclination of the line through A and B. (2)
- 1.2 What will be the gradient of the line perpendicular to $3x + 2y - 7 = 0$? (2)
- 1.3 Using a calculator find the values of the following if $x = 42^\circ$ and $y = 127,8^\circ$:
 1.3.1 $\sin 3x$ (1)
 1.3.2 $\cos^2(3x + y) - 2$ (2)
- 1.4 Simplify: $\frac{\sin(180^\circ + A)}{\sin(90^\circ - A)}$ (3)
- 1.5 Find the solution to $3 \tan 2x = 1$ on the interval $x \in [0^\circ, 270^\circ]$ (4)
- 1.6 Consider the diagram below:

- 1.6.1 Find the length of KT. (3)
 1.6.2 Find the length of PT. (3)
- 1.7 Draw, on the graph paper on your diagram sheet, a box and whisker diagram for a set of data with the following characteristics:
- Median is 17
 - Upper quartile is 20
 - Lower quartile is 11
 - Maximum value is 30
 - Range is 20

(5)

- 1.8 Find the volume of the right cone with slant height 13 mm and with radius of base 5 mm.

(3)
[33]

QUESTION 2

Consider parallelogram ABCD with co-ordinates as shown in the diagram below.

- 2.1 List two properties that are true of a rectangle which are not true of all parallelograms. (2)
- 2.2 Find the lengths of AC and BD (leave your answers in surd form). (4)
- 2.3 Find the gradients of AB and AD. (4)
- 2.4 Is ABCD a rectangle? Give two detailed reasons using your answers from 2.2 and 2.3. (2)

[12]

QUESTION 3

A triangle with vertices A (3;5); B (8;4) and C (2;2) is drawn. A copy of this diagram appears on your diagram sheet.

- 3.1 Give the co-ordinates of the vertices of the image $A'B'C'$ of $\triangle ABC$ when it is rotated 90 degrees anti-clockwise around the origin. (5)
- 3.2 Complete the generalisation of this transformation:
- $$(x; y) \longrightarrow (\dots\dots\dots; \dots\dots\dots) \quad (2)$$
- 3.3 Find the equation of the perpendicular bisector of BB' . (5)
- 3.4 Given that the equation of AA' is $y = -4x$, show that AA' and BB' intersect at the centre of rotation. (3)
- 3.5 Give the co-ordinates of the vertices of $A''B''C''$ if it is the image of $\triangle ABC$ when it is rotated through an angle of 180° . (3)
- [18]**

QUESTION 4

Square PQRS has vertices with co-ordinates as shown in the diagram below. This diagram is reproduced on your diagram sheet. PQRS is to be enlarged by a scale factor of 3.

4.1 On the diagram sheet draw this enlargement and indicate the vertices $P'Q'R'S'$ and the co-ordinates of these vertices. (7)

4.2 Calculate the length of a side of both PQRS and $P'Q'R'S'$ and hence determine the relationship between the increased length of the sides and the increased area of the squares. Work in surd form. (6)

[13]

QUESTION 5

Throughout this question a calculator may not be used and all working must be clearly shown.

5.1 Simplify the following:

$$5.1.1 \quad \frac{-\tan x \cdot \sin(90^\circ - x)}{\sin(-x)} - \frac{\tan(x - 180^\circ)}{\cos(90^\circ + x)} \quad (6)$$

$$5.1.2 \quad \frac{\cos 120^\circ}{\tan 225^\circ} \quad (4)$$

5.2 Consider the equation: $2\cos^2 x - \cos x = 0$

5.2.1 Factorise the left hand side of the equation. (1)

5.2.2 Find the general solution to the equation. (5)

5.3 If $\sin 58^\circ = k$, then find the following:

5.3.1 $\sin 238^\circ$ (2)

5.3.2 $\cos 58^\circ$ (3)

[21]

QUESTION 6

Four learners are arguing about whose trigonometric expression best describes a particular situation.

Sipho	Ray	Lorraine	Vishnu
$\frac{1 - \tan^2 \theta}{1 + \tan^2 \theta}$	$1 - 2\sin^2 \theta$	$1 - \sin \theta$	$2\cos^2 \theta - 1$

6.1 They each substitute $\theta = 30^\circ$ into their expression. They all get the same value. What is it? (1)

6.2 They each substitute $\theta = 50^\circ$. What value do they each get? (4)

6.3 Using your knowledge of trigonometric identities, show that three of the learners' expressions are exactly the same. (7)

[12]

QUESTION 7

You go down to the beach for a few days. As an experiment you place a metre stick in the sand to measure the height of the water. As the tide comes in, the height rises and then falls as the tide goes out. You record the heights for 48 hours – the height fluctuates between 0 cm and 50 cm. This is shown in the graph below:

The equation for the height of the water is: $y = 25\sin 18x + 25$ where y is the height of the water and x is the time in hours from the beginning of the experiment.

- 7.1 Calculate the height of the water when $x = 48$. (1)
- 7.2 Calculate the times when the height of the water is 10 cm by solving the equation $25\sin 18x + 25 = 10$ for the 48 hour interval rounded off to the nearest hour. (6)
- [7]

QUESTION 8

While you are on the beach you stand at the base of a life-guards' tower, B, and measure the angle of elevation of a lighthouse, PT, to be y . From the top of the 5 m high life-guards' tower, A, the angle of elevation of P is x .

8.1 Find the size of \hat{APB} in terms of x and y . (2)

8.2 Show that $PB = \frac{5 \cos x}{\sin(y - x)}$ (3)

8.3 Hence show that $PT = \frac{5 \cos x \cdot \sin y}{\sin(y - x)}$ (2)

[7]

QUESTION 9

The diagram alongside looks very similar to that for the Theorem of Pythagoras, except that the central triangle is not right-angled.

On each side of a triangle (with angles x , y and z) a square has been drawn. The outer corners of the three squares have been joined as shown to make three more triangles.

- 9.1 Complete the formula: area of $\triangle ABC = \frac{1}{2}bc$ (1)
- 9.2 Show that area $\triangle DAK = \text{area } \triangle ABC$. (3)
- 9.3 State with reasons what will be the relationship between the areas of $\triangle DAK$ and $\triangle EBF$. (2)
- [6]

QUESTION 10

On the beach you find 10 shells and measure their lengths. These lengths are given in the table below.

Length (cm)	$(x_i - \bar{x})$	$(x_i - \bar{x})^2$
3,2		
3,6		
5,0		
4,1		
4,3		
4,7		
3,4		
5,2		
4,6		
4,3		

- 10.1 Calculate the mean length of these ten shells. (2)

10.2 Complete the copy of your table on your diagram sheet and use it to calculate the standard deviation of the length of your sample of shells. (6)

10.3 You also measure the widths of the ten shells. The graph of each shell’s length plotted against its width is shown below. The graph is reproduced on the diagram sheet.

Draw an approximate line of best fit for the data and find its equation. (3)
[11]

QUESTION 11

A thousand pebbles from the beach are collected and their lengths are measured. The length of the smallest pebble is 1 mm and the largest is 95 mm. The lengths of the 1 000 pebbles are summarised in the table below:

Length of pebble (mm)	Number of pebbles	Cumulative frequency
$x < 20$	90	
$20 \leq x < 40$	240	
$40 \leq x < 60$	410	
$60 \leq x < 80$	200	
$80 \leq x < 100$	60	

11.1 Complete the cumulative frequency column in the copy of the table on your diagram sheet. (2)

11.2 Draw the ogive for this set of data using the graph paper on your diagram sheet. (5)

11.3 Find the median, upper quartile and lower quartile of the data using your graph. (3)
[10]

Grade 12 Mathematics: Question Paper 1**MARKS: 150****TIME: 3 hours****QUESTION 1**

- 1.1 Solve for x :
- 1.1.1 $\log_3 x = 2$ (1)
- 1.1.2 $10^{\log 27} = x$ (1)
- 1.1.3 $3^{2x-1} = 27^{2x-1}$ (2)
- 1.2 Determine the value of the following expression: $\sum_{i=3}^7 2i$ (2)
- 1.3 The sum of n terms is given by $S_n = \frac{n}{2}(1+n)$ find T_5 . (3)
- 1.4 Determine the 7th term of the following sequence: $64 ; \frac{3}{32} ; \frac{9}{16} ; \frac{27}{8}$ (3)
- 1.5 If inflation is expected to be 8.7% per annum for the next 10 years. During which year will prices be double what they are today? (3)
- 1.6 Given that $f(1) = 0$; solve for $f(x) = x^3 - x^2 - 4x - 4$ (4)
- 1.7 Given : $f(x) = \frac{1}{x-5}$
- 1.7.1 Determine the equation of the vertical asymptote of $f(x)$ (1)
- 1.7.2 Determine the y-intercept of $f(x)$ (1)
- 1.7.3 Determine x if $f(x) = -1$ (2)
- 1.7.4 Determine the equation of one of the axes of symmetry of $f(x)$. (2)
- 1.8 The inverse of a function is $f^{-1}(x) = 2x - 4$, what is the function $f(x)$? (3)
- 1.9 Which of the following functions does not increase over the interval (0;10)?
- A) $y = \log x$ B) $y = 10^x$ C) $y = \frac{10}{x}$ (2)
- 1.10 Determine a function $f(x)$ such that $f'(x) = 3x^2$ (2)
- 1.11 A car travelled for 1 hour. The average speed for the first 15 minutes was 60 km/h and for the remaining 45 minutes the average speed was 80km/h. How far did the car travel? (3)

[35]

QUESTION 2

- 2.1 The population of a certain bacteria in a body is expected to grow exponentially at a rate of 15 % every hour. If the initial population is 5 000. How long will it take for the population to reach 100 000? (4)
- 2.2 If the first term a geometric series is 10 and the common ratio is 0,5:
 2.2.1 Find the sum of the first 8 terms. (3)
 2.2.2 For what value of n is $|S_{\infty} - S_n| < 0,01$? (4)
- 2.3 The first, second and third terms and an arithmetic series are a ; b and $a - b$ respectively ($a > 0$).
 The first, second and third terms and a geometric series are a ; $a - b$ and 1 respectively.
 Show that $a = 9$ and determine the value of b . (6)
- 2.4 $n!$ is defined as $n! = n \times (n - 1) \times (n - 2) \times \dots \times 2 \times 1$ e.g. $4! = 4 \times 3 \times 2 \times 1 = 24$
 Evaluate the following: $\sum_{i=3}^5 i!$ (3)
[20]

QUESTION 3

- 3.1 You wish to purchase your first home. The bank will only allow bond repayments that are no greater than 30 % of your net monthly salary. Your gross salary is R 8 250 per month and you have deductions of 25 % per month from your salary.
 3.1.1 What is your net salary? (how much do you take home after deductions) (1)
 3.1.2 What is the maximum bond repayment you can afford? (1)
 3.1.3 The bank offers a fixed bond rate of 13,5% per annum compounded monthly, over a 20 year period. There is a flat that costs R 150 000. Can you afford the flat? (Show all working) (6)
- 3.2 A bank is offering a saving account with an interest rate of 10% per annum compounded monthly. You can afford to save R 300 per month. How long will it take you to save up R 20 000? (to the nearest month) (5)
[13]

QUESTION 4

4.1 The following data were collected. From the graph of this data, it would appear as if the output is an exponential function of the input: $f(x) = a \times b^x$

Input	-1	0	1	2	2,3	6
Output	0,67	2	6	17	24,9	1465

- 4.1.1 Kate used the input values of 0 and 1 and the corresponding output values to determine the function variables a and b . Write the function that Kate determined in the form $f(x) = \dots$ (3)
- 4.1.2 Dolly used the input values of 0 and 2 and the corresponding output values to determine the function variables a and b . Write the function that Dolly determined in the form $g(x) = \dots$ (3)
- 4.1.3 Determine $f(2,3)$; $f(6)$; $g(2,3)$; and $g(6)$ (2)
- 4.1.4 State, with reasons, which of the two functions is the better approximation of the relationship between *input* and *output*? (2)

4.2 Below are the graphs of $f(x) = x^2 + 4x + 3$ and $g(x)$ a cubic function. The two functions have the roots at A and B and $g(x)$ has another root at $x = \frac{1}{2}$. The length of DE = 6 units.

- 4.2.1 Find the roots at A and B. (3)
- 4.2.2 Give the co-ordinates of E. (1)
- 4.2.3 Find the equation of the function $g(x)$. (3)
- 4.2.4 Determine the co-ordinates of K, where the two functions intersect. (4)
- 4.2.5 Does F, the turning point of $g(x)$ lie on the axis of symmetry of $f(x)$? Show all working. (5)

- 4.2.6 There are two x values where the two functions are increasing at the same rate. Find these values correct to two decimal places.

(6)
[32]

QUESTION 5

- 5.1 The following seems to show that $2 = 1$. Explain where and why the error occurred.

line 1	a	$=$	b	
line 2	a^2	$=$	ab	multiply by a
line 3	$a^2 - b^2$	$=$	$ab - b^2$	subtract b^2
line 4	$(a - b)(a + b)$	$=$	$b(a - b)$	factorise
line 5	$(a + b)$	$=$	b	divide by $a - b$
line 6	$b + b$	$=$	b	$a = b$ so substitute b for a
line 7	$2b$	$=$	b	
line 8	2	$=$	1	divide by b

(3)

- 5.2 Given $f(x) = 2x^3 + x^2 - 7x - 6$

5.2.1 Determine all values of x such that $f(x) = 0$. (5)

5.2.2 Hence or otherwise solve: $2(x - 2)^3 + (x - 2)^2 - 7(x - 2) = 6$ (3)

[11]

QUESTION 6

- 6.1 Determine the derivative of $f(x) = \frac{1}{x-2}$ using first principles (5)

- 6.2 Determine $\frac{dy}{dx}$ if $y = \frac{x^3 + 2\sqrt{x} - 3}{x}$ (5)

- 6.3 For a given function $f(x)$ the derivative is $f'(x) = -x^2 - x + 2$
- 6.3.1 What is the gradient of the tangent to the function $f(x)$ at $x = 0$? (1)
- 6.3.2 Where is $f(x)$ increasing? (4)

- 6.4 A triangle is formed by the axes and a line passing through the point $P(2; 3)$.

- 6.4.1 If $y = mx + c$ is the equation of the line find c in terms of m . (2)
- 6.4.2 Find the x -intercept in terms of m . (2)
- 6.4.3 Give an expression for the area of the triangle in terms of m . (2)
- 6.4.4 Hence, or otherwise, find for what value of m , the triangle will have a minimum area. (5)
- [26]**

QUESTION 7

A company produces two types of jeans, straight-leg or bootleg. The straight-leg jeans requires twice as much labour time as the bootleg jeans. If all the jeans were bootleg jeans, then the company could produce a total of 500 jeans per day. The market limits the daily sales of straight-leg jeans to 150 and bootleg jeans to 250 per day. The profits for straight-leg jeans are R 8 and for bootleg jeans R 5.

- 7.1 If all the jeans were straight-leg jeans how many could be produced in a day? (1)
- 7.2 Sketch a graph of the feasible region. (5)
- 7.3 Determine the maximum profit the company could make on the production of jeans. (5)
- 7.4 If the profit on the straight-leg jeans increased to R 11, how many of each type of jeans should be produce? (2)
- [13]**

Grade 12 Mathematics: Question Paper 2

MARKS: 150 marks
TIME: 3 hours

QUESTION 1

- 1.1 $A(0;1)$; $B(-2;-3)$; $C(8;2)$; $D(d;6)$ are the vertices of the parallelogram ABCD.
- 1.1.1 Calculate the gradient of BC (2)
- 1.1.2 Hence, determine the equation of AD and use it to calculate the value of d . (4)
- 1.1.3 Calculate the equation of the altitude AE of $\triangle ABC$ with E on BC. (2)
- 1.1.4 Determine the coordinates of F, the point of intersection of the diagonals. (2)
- 1.2 In the diagram below triangle A'B'C' is the image of triangle ABC after a rotation of θ° about the origin.

- 1.2.1 If the coordinates of A and A' are $(4;7)$ and $(-8;1)$ respectively, show that $\theta = 112,62^\circ$ (6)
- 1.2.2 Hence, or otherwise, determine the coordinates of B' if B is the point $(8;14)$. (4)
- 1.3 Solve the following equations for: $0^\circ \leq x \leq 90^\circ$
- 1.3.1 $2\tan x = -0,6842$ (2)
- 1.3.2 $\sin 2x \cdot \cos x - \sin x \cdot \cos 2x = 0,500$ (2)

1.4 What function is represented by the following graph:

(2)

1.5

Runners completing a 10km race

The (cumulative frequency) ogive curve above represents the finishing times of the 590 runners who completed a 10km race.

- 1.5.1 Estimate in how many minutes a runner would have had to complete the race in order to place at the 15th percentile or better (2)
- 1.5.2 If a silver medal is awarded to all runners completing the race in under 40 minutes, estimate the number of runners who would have received a silver medal. (3)
- 1.5.3 Draw a box and whisker plot to summarise the data represented on the graph (5)

[36]

QUESTION 2

2.1

Refer to the diagram above and determine:

- 2.1.1 The equation of a circle, centre M, which touches the x - axis at A(2;0) and passes through B(4;-6). (7)
- 2.1.2 The equation of the tangent to the circle at B. (4)

2.2 Given the equation of the circle $x^2 + y^2 - 12x - 6y + 20 = 0$ and the line $2x + y - 5 = 0$

- 2.2.1 Show that the line and the circle cut each other at A(1;3) and B(3;-1). (6)
- 2.2.2 Determine the length of AB (leave your answer in simplified surd form). (3)
- 2.2.3 Determine the equation of the perpendicular bisector of AB. (5)
- 2.2.4 Hence or otherwise, determine the centre of the circle. (6)

[31]

QUESTION 3

3.1

In the diagram above:

- Triangle A'B'C' is the reflection of triangle ABC about the line $x = 4$; and
- Triangle A''B''C'' is the reflection of triangle A'B'C' about the line $x = 9$

This combination of transformations is called a composition of transformations

- 3.1.1 Determine (with justification) the values of p and q : the co-ordinates of C' (3)
- 3.1.2 Determine (with justification) the values of r and s : the co-ordinates of B'' (3)
- 3.1.3 Describe (with justification) a single transformation that would have the same result as the composition of transformations: *reflection about the line $x = 4$ followed by reflection about the line $x = 9$* , i.e. a single transformation that could be used to transform triangle ABC into triangle A''B''C'' (2)
- 3.1.4 By considering the point A(1;3) discuss whether or not the composition of transformations: reflection about the line $x = 9$ followed by reflection about the line $x = 4$ will give the same result as the composition above. (3)

3.2

In the diagram above hexagon $A''B''C''D''E''F''$ is the image of hexagon $ABCDEF$ after the following composition of transformations:

- Reflection about the line $y = x$ followed by:
- Reflection about the y -axis

3.2.1 Show that the co-ordinates of A'' are $(-3;4)$ if A is the point $(4;3)$ (3)

3.2.2 Hence, or otherwise, show that the composition of transformations above is equivalent to a rotation of 90° about the origin. (4)

[18]

QUESTION 4

4.1
$$\frac{\sin 3\theta}{1 + 2\cos 2\theta} = \sin \theta$$

4.1.1 Prove the above identity. (6)

4.1.2 Why is the identity not valid for $\theta = 60^\circ$ (2)

4.1.3 Without any further calculations, determine another value of θ for which the identity will not be valid. (1)

4.2 In the figure, TC is a vertical tower. Two wires leading from the top of the tower are staked at position A and position B so that A, B and C are all in the same horizontal plane. The angles TAB and TBA are measured and found to be β and θ respectively. The distance between the stakes is x metres. If the angle of elevation from stake A to the top of the tower is α , calculate the height of the tower in terms of x ; β ; θ and α .

(5)
[14]

QUESTION 5

The table below shows the time of sunrise and sunset in Cape Town for every 15th day of the year 2007 (source: <http://www.sao.ac.za>) and the graph shows the models referred to in the questions below.

		sunrise	sunset
day of year	date	hours:min	hours:min
1	01-Jan-07	05:38	20:01
15	15-Jan-07	05:50	20:00
30	30-Jan-07	06:05	19:53
45	14-Feb-07	06:20	19:40
60	01-Mar-07	06:33	19:23
75	16-Mar-07	06:46	19:04
90	31-Mar-07	06:57	18:43
105	15-Apr-07	07:08	18:24
120	30-Apr-07	07:20	18:07
135	15-May-07	07:31	17:54
150	30-May-07	07:41	17:46
165	14-Jun-07	07:49	17:44
180	29-Jun-07	07:52	17:47
195	14-Jul-07	07:49	17:55
210	29-Jul-07	07:41	18:04
225	13-Aug-07	07:28	18:15
240	28-Aug-07	07:10	18:25
255	12-Sep-07	06:50	18:35
270	27-Sep-07	06:29	18:46
285	12-Oct-07	06:09	18:57
300	27-Oct-07	05:51	19:10
315	11-Nov-07	05:37	19:23
330	26-Nov-07	05:29	19:38
345	11-Dec-07	05:28	19:50
360	26-Dec-07	05:34	19:59

After plotting the times of sunrise and sunset on the graph, Frank has determined that he will use the cosine function to model the data with each day of the year corresponding to a degree, i.e. the 15th day of the year is represented by $x = 15^\circ$.

Frank's model for sunrise is given by:

$$f(x) = 1,2 \cos(x - 180^\circ) + 6,66$$

The graphs are shown on the next page.

- 5.1 Show that this model gives the correct time for sunrise on day 180. (3)
- 5.2 By how many minutes does the time of sunrise predicted by Frank's model differ from the actual time of sunrise on the 60th day of the year? (3)

Developing a model for the time of sunset:

- 5.3 Show that the time difference, in decimals, between the earliest and the latest time of sunset $\approx 2,283$. (3)
- 5.4 Hence, or otherwise, explain how the time of sunset can be modeled with the function: $g(x) = a \cos(x + p) + q$; where $a = 1,142$; $p = 0$; and $q = 18,875$ (4)
- 5.5 By how many minutes does the time of sunset predicted by this model differ from the actual time of sunset on the 285th day of the year? (3)

$h(x)$, shown on the graph, is a model that predicts the number of hours of sunlight for each day of the year.

- 5.6 Express $h(x)$ in terms of $f(x)$ and $g(x)$ (2)
- 5.7 Hence of otherwise determine the day of the year and the number of hours of sunlight on the day with: (2)
- (a) the most hours of sunlight (2)
- (b) the least hours of sunlight (2)
- 5.8 By how many minutes does the actual number of hours of sunlight and the predicted number of hours of sunlight differ on the 75th day of the year? (4)

[26]

QUESTION 6

Refer to the Standard Normal distribution curve supplied alongside to answer questions 6.1 and 6.2:

6.1 Mrs. Hlope is a real estate agent. Last month, the sale prices of homes in her area approximated a normal distribution with a mean of R150 000 and a standard deviation of R25 000.

6.1.1 A house had a sale price of R175 000. What is the percentile rank of its sale price, to the *nearest whole number*? Explain what that percentile means. (4)

6.1.2 Mrs. Hlope told a customer that most of the houses sold last month had selling prices between R125 000 and R175 000. Explain why she is correct. (5)

- 6.2 The test results and various calculations for 20 students appear in the table alongside.

Test results	$(x - \bar{x})$	$(x - \bar{x})^2$
59	-3,7	13,69
58	-4,7	22,09
57	-5,7	32,49
55	-7,7	59,29
68	5,3	28,09
54	-8,7	75,69
89	26,3	691,69
73	10,3	106,09
60	-2,7	7,29
98	35,3	1246,09
65	2,3	5,29
18	-44,7	1998,09
59	-3,7	13,69
48	-14,7	216,09
58	-4,7	22,09
56	-6,7	44,89
72	9,3	86,49
60	-2,7	7,29
74	11,3	127,69
73	10,3	106,09

$$\bar{x} = 62,7$$

$$\sum (x - \bar{x})^2 = 4910,2$$

- 6.2.1 Determine the standard deviation of the test results (2)
- 6.2.2 Determine what percent of the students scored within one standard deviation of the mean. (3)
- 6.2.3 Hence, or otherwise, determine whether the test results approximate a normal distribution. Justify your answer. (3)

[17]

QUESTION 7

The scatter plot on the right compares egg weight and new-born chicken weight for a number of chicken eggs.

Each of the lines can be used to predict new-born chicken weight for given egg weights. Which line:

- | | | |
|-----|-------------------------------------------------------------------------------------------------|------------|
| 7.1 | Predicts new-born chicken weights that are too high? How can you tell this from the plot? | (2) |
| 7.2 | Predicts new-born chicken weights that are too low? | (1) |
| 7.3 | Overestimates new-born chicken weight for lighter eggs? How can you tell this from the plot? | (2) |
| 7.4 | Overestimates new-born chicken weight for heavier eggs? | (1) |
| 7.5 | Tends to be the best predictor of new-born chicken weight? How can you tell this from the plot? | (2) |
| | | [8] |

Grade 10 Mathematical Literacy**MARKS: 150****TIME: 3 hours****QUESTION 1**

- 1.1 Calculate the following:
- 1.1.1. $3,5(7,45 - 2,98)$ (1)
 - 1.1.2 $35 + 12 \times 4$ (1)
 - 1.1.3 $\frac{3}{4}$ of R375 (2)
 - 1.1.4 $\frac{3}{4} + 1\frac{1}{2}$ (1)
- 1.2 A pair of jeans costs R299. How much will you pay for them if you get a $33\frac{1}{3}\%$ discount? (2)
- 1.3 The dilution instructions on an energy sports drink concentrate are: dilution ratio (concentrate and water) 1 + 4.
- 1.3.1 Explain what is meant by this instruction. (2)
 - 1.3.2 How many ml of concentrate and how many ml of water do you need to make up 1litre of energy drink? (2)
 - 1.3.3 If your friend mixes $3\frac{1}{2}$ cups concentrate with 15 cups of water, will his energy drink taste the same as yours? Explain your answer. (3)
- 1.4 Vusi works at a car-wash. He earns R55 a day plus R10 for every car he washes. Calculate how much he earned if he:
- 1.4.1 washed 5 cars. (2)
 - 1.4.2 washed 7 cars (2)
 - 1.4.3 washed n cars. (2)
- 1.5 Fatimah is getting a 5,5% increase in salary and Ali is getting an increase in salary of R292,50 more per month. Fatimah earns R4 575 per month and Ali earns R6 500 per month.
- 1.5.1 Determine Fatimah's new salary per month. (2)
 - 1.5.2 Who received the greater increase in terms of actual money? (1)
 - 1.5.3 Who received the greater percentage increase? Show your working. (2)
- 1.6 Prisilla earned R1 725 for 15 days work. Determine how much she would earn if she worked for 20 days. (3)
- 1.7 The scale on a map is 1:50 000. If the distance between two towns on the map is 3,7cm, determine the distance between the towns in kilometers. (4)

- 1.8 Bongani sells small wire and bead items at the side of the road. He records his earnings for a week. Use the information below to answer the questions that follow:

	Earnings
Monday	R49,50
Tuesday	R172,00
Wednesday	R185,50
Thursday	R113,50
Friday	R139,00
Saturday	R405,00
Sunday	R54,50

- 1.8.1 Calculate his mean earnings per day. (3)
 1.8.2 Determine his median earnings for the week. (2)

- 1.9 Use the diagrams alongside, and the formulae below to answer the following questions:

Formulae:

$$\text{Perimeter rectangle} = 2 \times (l + b)$$

$$\text{Area rectangle} = l \times b$$

$$\text{Volume of a rectangular prism} = l \times b \times h$$

$$\text{Circumference of a circle} = 2 \times \pi \times r$$

$$\text{Area of a circle} = \pi \times r^2$$

$$\text{Where } \pi = 3,14$$

- 1.9.1 Calculate the area of the rectangle. (2)
 1.9.2 Calculate the circumference of the circle. (2)
 1.9.3 Calculate the volume of the box. (2)
 1.9.4 Calculate the surface area of the box. (4)

[47]

QUESTION 2

- 2.1 A bank offers 12% interest per annum. Describe, in your own words, what is meant by word interest in this context. (3)

- 2.2 A person invests R1 000,00 at an annual interest rate of 12% for a period on 6 years. Interest is compounded annually. The table alongside is a statement of the investment account.

	Interest credited	Balance
Opening balance		R1 000,00
End year 1	R120,00	R1 120,00
End year 2	R134,40	R1 254,40
End year 3	R150,53	R1 404,93
End year 4	R168,59	R1 573,52
End year 5	R188,82	(a)
End year 6	(b)	(c)

- 2.2.1 Why is the interest earned by the person at the end of year 2 not the same as the interest earned at the end of year 1? (2)
- 2.2.2 Calculate the values of a, b and c (6)
- 2.2.3 How much interest did the person earn over the 6 year period? (2)
- 2.2.4 Express the amount of interest earned over the 6 year period as a percentage of the amount invested. (2)
- 2.2.5 How much interest would the person have earned over the 6 year period if interest had not been compounded – i.e. the person had earned 12% simple interest per year for the period? (3)

[18]**QUESTION 3**

A herbal medicine dosage pamphlet gives the following rule for determining a child's dosage in terms of the adult dosage:

Young's rule: Divide the child's age by the child's age plus 12.

Example: dosage for a 4 year old: 4 divided by $(4+12) = \frac{1}{4}$ or 0,25 of the adult dosage.

Answer the questions that follow (which refer to doses of herbal medicine) using this formula.

- 3.1 What fraction of an adult dosage must a 12 year old take? (3)
- 3.2 If the adult dosage of a certain medicine is 60 drops, how many drops should an eight year old child be given? (5)
- 3.3 A mother gives her child 4 drops of medicine. The adult dosage is 20 drops. How old is the child? (6)

[14]

QUESTION 4

A school counselor conducted a survey among a group of high school students using the following survey slip:

Survey (please tick the correct boxes)			
Sex:	<input type="checkbox"/> Male	<input type="checkbox"/> Female	
Age:	<input type="checkbox"/> 13 -14	<input type="checkbox"/> 15 - 16	<input type="checkbox"/> 17 – 18
How much pressure do you feel to achieve at school?			
<input type="checkbox"/> None	<input type="checkbox"/> A little	<input type="checkbox"/> A lot	<input type="checkbox"/> An unbearable amount

- 4.1 Show, by completing the survey slip on the answer sheet, how Samantha – a 14 year old girl who feels a lot of pressure to achieve at school – would complete the survey form. (3)
- 4.2 The counselor has summarised the data from all of the completed survey forms in the table below. Use this summary to answer the questions that follow:

	Male			Female		
	13 – 14	15 – 16	17 – 18	13 – 14	15 – 16	17 – 18
None	4	1	-	5	4	4
A little	9	4	3	7	4	6
A lot	1	3	1	3	6	8
An unbearable amount	3	4	2	2	4	7

- 4.2.1 How many males and how many females participated in the survey? (2)
- 4.2.2 The counselor wrote in his report: “*more than two out of every five teenagers feel either a lot or an unbearable amount of pressure to achieve at school*”. Show how the counselor could have come to this conclusion. (4)
- 4.2.3 Do boys and girls experience this pressure equally or differently? Substantiate your answer using the information in the table? (5)
- 4.2.4 The counselor illustrated his report with the following graph:

- (a) What impression does the graph create about the number of male and female participants? (2)
- (b) Is this impression correct? Substantiate your response (3)
- (c) What has the counselor done in developing the graph to create that impression? (2)
- 4.2.5 The counselor has summarised the data in a different way in the table below

	Male			Female		
	13 – 14	15 – 16	17 – 18	13 – 14	15 – 16	17 – 18
None	65%	42%	a	71%	44%	40%
A little						
A lot	35%	58%	b	29%	56%	60%
An unbearable amount						

- (a) By referring to the earlier table show that the values of a and b are both 50%. (3)
- (b) By comparing the responses for the females according to age describe the trend in the data by rewriting the sentence, making the best choices from the words in brackets:
“(Older/younger) girls are more likely to experience a lot or an unbearable amount of pressure than (older/younger) girls”. Substantiate your claim. (4)
- (c) What graph would you choose to illustrate the observation described in (b)? Why would this type of graph illustrate the point most effectively? (4)

[32]

QUESTION 5

- 5.1 The timetable for movies at the local cinema is shown alongside. Use it to answer the questions that follow:

Date	Cinema	Available show times					
		1	2	3	4	5	6
Wed 17 Oct	18	09:45	12:15	15:00	17:45	20:15	22:45
Thu 18 Oct	18	15:00	17:45	20:15	22:45		
Fri 19 Oct	17	09:15	11:45	14:45	17:00	19:30	22:15
Sat 20 Oct	17	09:15	11:45	14:45	17:00	19:30	22:15
Sun 21 Oct	17	09:15	11:45	14:45	17:00	19:30	
Mon 22 Oct	17	09:15	11:45	14:45	17:00	19:30	
Tue 23 Oct	17	09:15	11:45	14:45	17:00	19:30	22:15

- 5.1.1 In which cinema will the movie be on Fri? (1)
- 5.1.2 On which day of the week is it possible to watch a movie at 3pm? (2)
- 5.1.3 How long after the start of show 2, does show 3 start on Friday? (3)
- 5.1.4 How long after the start of show 3, does show 4 start on Friday? (3)
- 5.1.5 Hence, or otherwise, estimate how late the last movie will end on Friday. Justify your answer (4)

- 5.2 The seating plan for the cinema is shown below. The key (at the bottom of the plan) defines the different categories of seats and their costs. Use this seating plan to answer the questions that follow:

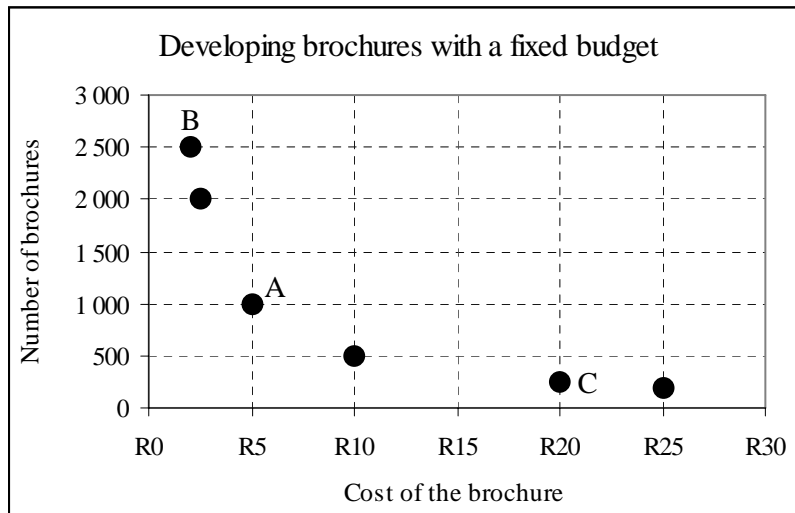

- 5.2.1 How many seats are there in row G? (1)
- 5.2.2 How much does a ticket for each of the following seats cost? (3)
- B3
 - K3
 - K9
- 5.2.3 Give the seat numbers of the wheel chair seats that cost R45,00 per seat. (3)
- 5.2.4 Why is there no row I? (2)
- 5.2.5 By discussing the view that you would have of the screen from your seat, and comparing the price of the seat with others; discuss whether you think it is correct to treat seat O24 as a category1 (Cat 1) seat. (5)

[27]

QUESTION 6

The graph below depicts the summary of Sello's research into the number of advertising brochures that can be printed with a fixed budget. Answer the questions that follow.

- 6.1 What does point A tell us? (2)
- 6.2 Calculate the budget that Sello has to develop brochures with. (3)
- 6.3 Calculate, the **cost** of the brochures represented by point B. (3)
- 6.4 Calculate, the **number** of brochures represented by point C. (3)
- 6.5 Describe the trend in the graph by completing the sentence: “As the cost of brochures increase, the number of brochures that can be printed ...” (1)

[12]

– End of Paper –

Grade 11 Mathematical Literacy: Question Paper 1**MARKS: 100****TIME: $2\frac{1}{2}$ hours****SECTION A****QUESTION 1**

- 1.1 Notice that this examination paper is 2 and a half hours long and is out of a total of 100 marks.
- 1.1.1 How many minutes do you have in which to complete the paper? (1)
- 1.1.2 At what rate must you work to ensure that you finish the examination within the time allowed? (2)
- 1.1.3 Using your answer to 1.1.2 above, which question should you be working on 15 minutes after the examination has started? (2)
- 1.2 Calculate each of the following (you need only write down the answer):
- 1.2.1 $260 + 75 \times 2$ (1)
- 1.2.2 $6 \times \frac{2}{3} + 15 \times \frac{1}{3}$ (2)
- 1.2.3 $(2,3 + 3,7) \div 0,6$ (1)
- 1.3 There are 11 people in a soccer team. If there are 49 boys in Grade 11 at your school who play soccer.
- 1.3.1 What is the maximum number of soccer teams that can be made? (2)
- 1.3.2 The ratio of soccer players to non-soccer players in Grade 11 is 1:3. What is the total number of learners in Grade 11? (2)
- 1.4 A soccer team practices for 4 hours a week. Their coach increases their practice time by 8 %. For how long will they practice now? (2)
- 1.5 Express 50 as a percentage of 196. (2)
- 1.6 Your favourite shop is offering a discount of 20% on an item of clothing which costs R180. How much does it cost now? (2)
- 1.7 Bananas are sold at R5,95 per kilogram. How much would you have to pay 0,4kg of bananas? (2)
- 1.8 What is the mass (weight), in kg, shown on the dial alongside.

(2)
[24]

QUESTION 2

Refer to the till slip below to answer the questions which follow:

**WELCOME TO
ZWAANSWYK SPAR**

TEL: 021 713 3779

FAX: 021 713 3997

VAT NO.: 4140235797

CASHIER NAME: SAMANTHA
C0017 #7616 13:06:11 13JUL2007

- 2.1 On what date and at what time did this transaction take place? (2)
- 2.2 How does the till slip indicate items that are zero rated with respect to VAT? (1)
- 2.3 What does the “6” on the left of “BALANCE DUE” refer to? (1)
- 2.4 What does the “Rounding” entry indicate? Why is this necessary? (2)
- 2.5 How much does the customer actually pay for these goods? Justify your answer. (2)
- [8]**

QUESTION 3

The table below is an extract from the Vodacom tariff tables for the 4U and Top Up 135 packages. Use the information in the table to answer the questions which follow:

Package	4U	TopUp 135
Domestic Calls		
Vodacom to MTN / Cell C (Off Peak)	1,30	1,05
Vodacom to MTN / Cell C (Peak)	2,99	2,75
Vodacom to Telkom (Peak)	2,85	2,20
Vodacom to Vodacom (Peak)	2,85	1,80
Vodacom to Vodacom / Telkom (Off-Peak)	1,12	0,97

<http://www.vodacom.co.za/>

- 3.1 What is the charge for a Vodacom to Telkom call during *Off Peak* time if you have a Vodacom 4U package? (1)
- 3.2 Elsie has a TopUp 135 package. She makes a call to her mother's MTN cell-phone during *Peak* time. If the call lasts 3 minutes, how much does it cost? (2)
- 3.3 A Vodacom TopUp 135 customer is shocked to find that a single call has cost her R24,40. The call was made during *Peak* time to a Telkom number. How long was this call? (3)
- 3.4 How much would the customer in question 3.3 have saved by making the same call during *Off Peak* time? (3)

[9]

QUESTION 4

Below is a diagram of a tin of Italian tomatoes. The label is pasted around the tin but does not overlap at all. The radius of the tin is $3,5\text{cm}$ and the height is $10,5\text{cm}$.

Use the following to answering the questions below:

$$\pi = 3,14$$

$$\text{volume cylinder} = \pi \times r^2 \times h.$$

$$\text{circumference of a circle} = 2 \times \pi \times r$$

- 4.1 Calculate the volume of the tin? (3)
- 4.2 Determine the length and breadth of the label. (3)
- 4.3 If the dimensions of a sheet of printing paper are 75cm by 65cm , determine the maximum number of labels that can be printed on one sheet. (5)

[11]

QUESTION 5

In a survey of 2435 people in 2005, researchers tested participants' HIV status. The graph below shows the results.

- 5.1 What percentage of the total number of participants were male and HIV positive? (1)
- 5.2 Calculate the number of females who participated in the survey. (3)
- 5.3 What percentage of the men who participated in the survey were HIV positive? (4)
- [8]**

SECTION B**QUESTION 6**

The monthly income and costs of a company which produces soccer balls can be calculated using the formulae:

$$\text{Income} = 4 \times x \text{ and } \text{Costs} = x + 1200$$

where x is the number of soccer balls sold.

- 6.1 On the same system of axes, plot graphs showing the company's monthly costs and income for values of x from 0 to 500. You may first complete a table of values if this helps. (5)
- 6.2 Hence, or otherwise, determine how many soccer balls the company needs to sell if it is to break even? (3)
- 6.3 Indicate your answer to 6.2 on the graph you have drawn in 6.1. (1)
- 6.4 If the company produces 905 soccer balls in January, what is the profit at the end of January? (2)

[11]

QUESTION 7

A number of people from each age group listed below were tested for HIV in 2005. Use the information contained in the bar chart below to answer the questions that follow:

SOUTH AFRICAN NATIONAL HIV SURVEY, 2005. <http://www.avert.org/safricastats.htm>

- 7.1 Which age group had the highest prevalence of HIV in 2005? (1)
- 7.2 Amongst which two age groups was the HIV prevalence the same? (2)
- 7.3 Amongst which age group was HIV most prevalent in women? (2)
- 7.4 If 132 people were tested in the age group; between 15 and 19 years, calculate how many people in this age group were HIV positive in 2005, according to this survey. (3)
- 7.5 Compare the prevalence of HIV in men and women aged between 25 and 29. (4)
- [12]**

QUESTION 8

The front and side elevations of a house are shown below.
Use them to answer the questions which follow:

- 8.1 The roof of this house is made of corrugated iron sheets.
Use the Theorem of Pythagoras $c^2 = a^2 + b^2$ to calculate the length of the roof sheets, indicated by A in the diagram. (3)
- 8.2 Suggest a reason why all the measurements are given to three decimal places. (2)
- 8.3 The floor slab of a house is a block of cement which sits directly beneath the house. For this particular house, the floor slab is 150mm thick.
- 8.3.1 Determine the surface area of the top of the floor slab. (3)
- 8.3.2 Convert 150mm to a measurement in meters. (1)
- 8.3.3 Calculate the volume of the floor slab. (3)
- 8.3.4 Once mixed with sand and water, five bags of cement will produce enough cement to fill a volume of 1m^3 . Calculate how many bags of cement would be needed to produce the floor slab for this house. (2)
- 8.3.5 It costs R55,99 for a bag of cement. Calculate the cost of the cement needed for this floor slab. (2)

[16]

– End of Paper –

Grade11 Mathematical Literacy: Question Paper 2**MARKS: 100****TIME: $2\frac{1}{2}$ hours**

World Vision (www.worldvision.org) tells the story of Liber, a six year old Bolivian boy, who was forced together with his family to flee his home as a result of flooding. He and his family have taken up temporary accommodation in a camp with some 300 other people. Liber and his family lost everything as a result of the flood. To help his family make ends meet, Liber and his father Esteban get up at 6 a.m. each morning to purchase bulk ice cream supplies, which they bring back to the camp in a white cart. They spend the rest of the day pushing the cart around selling ice cream.

**QUESTION 1**

Thabo lives in Johannesburg and is exploring selling ice cream in order to pay for his college fees. He has established the following information:

EXPENSES:

- **R3 000,00** monthly payment for the first 12 months to pay for the bicycle and franchise fee.
- **R3,50** per ice cream to the company
- **R0,50** for a serviette and spoon that he supplies with each ice cream
- **R0,50** franchise fee per ice cream to the company
- **R25,00** per day for the block of ice that he uses to keep the container cold

INCOME:

- **R10,00** per ice cream that he sells.

1.1 Identify Thabo's fixed monthly costs.

(1)

1.2 Identify Thabo's variable costs.

(2)

- 1.3 Identify Thabo's source(s) of income and classify it as fixed or variable (2)
The company has told Thabo that salesmen typically sell a minimum of 30 ice creams and a maximum of 60 ice creams per day.
- 1.4 Show that Thabo's variable expenses for a day on which he sells 30 ice creams is: R160,00 (3)
- 1.5 Hence, or otherwise, complete the table below (only write down the values of a, b and c and your working for each value in your answer book) (6)

Monthly expenses				
No of days worked in the month	4	8	15	30
30 ice creams sold per day	R3 640,00	a	b	c
60 ice creams sold per day	R4 180,00	R5 360,00	R7 425,00	R11 850,00

- 1.6 Complete the following table (only write down the values of a, b and c and your working for each value in your answer book) (6)

Monthly income				
No of days worked in the month	4	8	15	30
30 ice creams sold per day	R1 200,00	a	b	c
60 ice creams sold per day	R2 400,00	R4 800,00	R9 000,00	R18 000,00

- 1.7 Thabo has used the values from the tables above to draw the graph below to compare the monthly income and expenses for the 60 ice creams-a-day scenario. Draw a similar graph for the 30 ice creams-a-day scenario on the graph paper provided. (6)

- 1.8 Use your graph and Thabo's graph above to answer the following questions:
- 1.8.1 Roughly how many days should Thabo work in order to cover his expenses in each scenario? (2)
- 1.8.2 Roughly how many days should Thabo work for each scenario in order to make a profit of at least R2 000,00 per month? (2)

[30]

QUESTION 2

A drawing of the bicycle appears alongside with the dimensions of the cooler box marked.

- 2.1 If the cooler box is drawn to scale determine the dimensions of the lid of the cooler box (show all working)

- 2.2 If the walls of the cooler box are 8cm. thick to ensure good insulation, what are the internal dimensions of the cooler box?

The ice creams that are sold by the company come in tubs with a diameter of 7cm and a height of 5,4cm.

- 2.3 Use the formula for the volume of a cylinder ($\text{Volume} = \pi \times r^2 \times h$) to show that the tubs can hold the 200ml of ice cream marked on the side of the tub. Use $\pi = 3,14$.

- 2.4 If Thabo places a single ice block with dimensions 20cm \times 20cm \times 20cm in the cooler box at the start of each day, estimate (showing detailed calculations and/or diagrams) how many ice cream tubs will be able to fit inside the cooler box

(6)

[19]

QUESTION 3

The time table for the Metrobus (www.mbus.co.za) and the fare table are supplied below. Use these tables to answer the questions that follow.

Thabo stores his bicycle in a garage in Parktown and lives near to the Southgate Centre and travels by bus to get from home to where he stores his bicycle.

It takes Thabo approximately 10 minutes to walk from home to the bus stop.

It takes Thabo approximately 15 minutes to walk from the bus stop to his bicycle.

- 3.1 At what time should Thabo leave home to reach his bicycle as early as possible and at what time can he expect to get there? Describe his journey in detail to substantiate your answer. (5)
- 3.2 How much will the appropriate one-way ticket on the bus cost Thabo? Explain how you have come to your answer (3)
- 3.3 By what time should Thabo have packed away his bicycle if he is to get home by bus? What time will he get home? (4)

[12]

QUESTION 4

In order to assist him in planning which flavours of ice cream to buy, Thabo conducted a survey the results of which are shown below. The questions that follow are based on the information contained in these graphs

- 4.1 How many people participated in the survey according to the following graphs above:
- 4.1.1 “What is your favourite ice cream”
- 4.1.2 “Responses by sex”
- 4.1.3 “Responses by age” (3)
- 4.2 Suggest a possible reason for the discrepancy between the number of participants in these graphs. (1)
- 4.3 Why is the “Response by sex” graph misleading? What impression does it create and what is this the result of? (4)
- 4.4 From the survey it would appear that 35+ year olds do not like bubble gum flavoured ice cream. By referring to the sample size comment on how reliable you think this observation is? (2)
- 4.5 Thabo has used a compound bar graph to represent the “Answer by sex” data. What has he gained and what has he lost by doing this instead of using a bar graph as he has in the other graphs? (2)
- 4.6 Use the information provided to determine the actual number of respondents by age for chocolate and strawberry ice cream and hence draw a bar graph of “Answer by age” based on actual numbers. (8)
- 4.7 Compare the two representations of “Answer by age” and identify an advantage or disadvantage of each representation. (4)
- 4.8 Thabo buys the ice creams in boxes of 24 ice creams. He has enough money to buy 20 boxes which he keeps in a freezer at his home. Use the data collected in the survey to help him decide on how many boxes of each flavour he should buy. (6)

[29]**QUESTION 5**

Dry-ice is sold in half-kilogram blocks. The people who sell the ice cream have developed the following rule of thumb to guide them when deciding how many half-kilogram blocks to buy:

To keep the food frozen for 4 hours:

$$\text{Kilogram of dry-ice needed} = \frac{\text{kilograms of food}}{5} + \frac{1}{2}$$

To keep the food frozen for 12 hours:

$$\text{Kilogram of dry-ice needed} = \frac{\text{kilograms of food}}{4} + 1\frac{1}{2}$$

- 5.1 If Thabo wants to keep 45 ice-creams (200g each) frozen for 12 hours, how many half-kilogram blocks should he buy? (6)
- 5.2 How many ice creams can Thabo keep frozen for 4 hours if he brought 7 half-kilogram blocks of dry-ice? (4)

Grade 12 Mathematical Literacy: Question Paper 1

MARKS: 150**TIME: 3 hours**

Section A

QUESTION 1

- 1.1 Calculate
- 1.1.1 $540 - 23,4 \times 10$ (1)
- 1.1.2 $\frac{3}{4}$ of 96 (1)
- 1.1.3 20% of R1400 (1)
- 1.1.4 $0,5(5,9 + 1,4) - 1,35$ (1)
- 1.2 Express
- 1.2.1 4 meters in millimeters (1)
- 1.2.2 5,34 million as a number without the word million (1)
- 1.2.3 500 milliliters in liters (1)
- 1.3 A shop sells muffins for R33,96 per dozen. What is the effective cost of one muffin? (2)
- 1.4 An economy pack of vitamin tablets contains 100 tablets. The recommended dosage is two per day. How many weeks will the box last? (3)
- 1.5 A packer at a local supermarket earns R15 per hour. In one month he works 12 shifts from 16:30 to 19:00 each time. How much will he earn? (2)
- 1.6 Chemical weed killer needs to be mixed with water before spraying. The instructions say that 2 parts of weed killer must be mixed with 5 parts of water. How many milliliters of water must be mixed with 10ml of weed killer? (2)
- 1.7 A rugby squad consists of 30 players. 40% of the players catch a stomach bug before a big game. How many players are left to play? (2)
- 1.8

What is the temperature, in degrees Celsius, shown on the thermometer in the diagram? Answer as accurately as possible. (2)

- 1.9 Cooking instructions for a Christmas turkey say that it must cook for 20 minutes per 500g, plus 15 minutes extra. How long should a 4kg turkey take to cook? Answer in hours and minutes. (3)
- 1.10 The number of pupils in a school has increased from 970 pupils in 2006 to 1150 pupils in 2007. What is the percentage increase in the enrolment at the school? (3)

[26]

QUESTION 2

- 2.1 A recent survey looked at households in two income groups. The study determined what percentage of monthly income was spent on food, housing and other requirements. The pie charts below represent the findings of the study.

Spending by a household in Group 1
Average monthly income: R3 000 per month

Spending by a household in Group 2
Average monthly income: R20 000 per month

- 2.1.1 What were the monthly incomes of the groups considered? (2)
- 2.1.2 What percentage of Group 1's earnings was spent on housing? (2)
- 2.1.3 How much was spent on housing by a household in Group 2? (2)
- 2.1.4 Which group spent the larger amount of money on food? Justify your answer using calculations. (5)

- 2.2 One family, earning R3 000 per month, spends approximately R1 630 per month on food.

- 2.2.1 The mother of the family, Mrs Abrahams, goes shopping for food every Saturday. If she is to keep within the food budget, what is the maximum amount she can spend each week, to the nearest R100? (2)
- 2.2.2 She needs to buy the following basic items every week:
 9 liters of milk @ R4,98 per liter
 7 loaves of bread @ R4,70 each
 2kg rice @ R3,98 per kg
 What is the total for her basic purchases? (4)
- 2.2.3 She considers buying sugar and has four options:
 A. 500g for R5,90
 B. 2,5kg for R12,99
 C. 5kg for R27
 D. 10kg for R50
 Arrange these options in order, from most economical to least economical, giving reasons for your answer. (5)
- 2.2.4 Give a financial reason why Mrs Abrahams might not choose the most economical option. (2)

[24]

QUESTION 3

3.1 A recent soccer coaching clinic drew 2 600 entrants for the first try out.

- 3.1.1 Half of the entrants were disqualified as they were not in the age group 13 – 15 years old. One in five of the remainder made it to the second day of the clinic. How many people were at the second day of the clinic? (3)
- 3.1.2 Each person on the second day was given a 350 ml bottle of Coca Cola. How many liters of Coke was this in total? (2)
- 3.1.3 The Coke bottles were packed in crates with 12 bottles in each layer and 2 layers of bottles. How many crates were needed? (3)
- 3.1.4 Finally, 10 people were chosen to go through for long-term coaching. What percentage of the original number of entrants does this represent? (2)

3.2 The table below shows the results from the Premier Soccer League for 2006.

	Played	Won	Drawn	Lost	Goals For	Goals Against	Goal Diff.	Points
Mamelodi Sundowns	30	16	9	5	45	19	+26	57
Orlando Pirates	30	A	12	4	39	24	+15	54
Kaizer Chiefs	30	12	14	4	39	26	+13	50
Moroka Swallows	30	12	10	8	39	33	B	46
Silver Stars	30	11	9	10	34	32	+2	42
Golden Arrows	30	9	13	8	32	C	+4	40
Supersport Utd	30	10	10	10	43	41	+2	40
Santos	30	7	17	6	35	32	+3	38
Jomo Cosmos	30	10	8	12	31	32	-1	38
Bloemfontein Celtic	30	9	10	11	35	37	-2	37
Ajax Cape Town	30	8	11	11	D	42	-2	35
Black Leopards	30	9	7	14	31	39	-8	34
Dynamos	30	7	10	13	24	38	-14	31
Tembisa Classic	30	7	9	14	23	37	-14	*
Bush Bucks	30	6	12	12	25	48	-23	30
Free State Stars	30	4	17	9	34	41	-7	29

Last Updated: 13 May 2006 (source www.psl.co.za)

- 3.2.1 How many games did each team play in the season? (1)
- 3.2.2 What is the significance of the + and the – symbols in the Goal Diff. column? (2)
- 3.2.3 Some of the results have been replaced by the letters A, B, C and D. Determine what values should be in each of these places. (4)
- 3.2.4 The fans of the Free State Stars are disappointed that their team came last, because they only lost 9 games out of 30 played. The top team, Mamelodi Sundowns, lost 5 games out of 30. Explain why there is such a great difference in points for the two teams. (2)
- 3.2.5 Calculate the final points for Thembisa Classic if a team earns 3 points for a win; 1 point for a draw and no points for a loss. (3)

[22]

QUESTION 4

P08689: CALEDONIAN KWIKSPAR

This receipt was issued when pre-paid electricity was purchased.

- 4.1 What is the name of the business that sold the electricity? (1)
- 4.2 The time of the purchase is given as 17:56:00. Write this as a time using am/pm notation. (2)
- 4.3 How much did the client pay for the electricity itself? (2)
- 4.4 Show by calculation that the VAT (of 14%) is based on both the electricity and the AUJX5 amounts. (3)
- 4.5 Refer to the line marked ##. The number of units purchased has been shown but the cost per unit has been omitted. Determine the cost per unit in cents. (3)
- 4.6 The household which purchased this electricity uses about 35 units per day during winter. For how many days would the amount purchased on this slip last? (3)
- 4.7 Estimate the total amount that the family can expect to pay for electricity for the month of August, including VAT and AUJX5 charge. (6)

[20]

Section B

QUESTION 1

The table below is an extract from a letter from Sanlam to Mr Moloke. It shows the amounts that are available on instant loan from Sanlam and the repayment involved.

Dear Mr Moloke, As a valued Sanlam customer, we are pleased to be able to offer you a personal loan at the following rates.				
Loan Amount	24 months	36 months	48 months	60 months
R4 000	R229	R174	R147	R131
R8 000	R448	R338	R285	R253
R16 000	R864	R643	R534	R470
R25 000	R1 344	R1 000	R830	R730
FIXED REPAYMENTS!!!!!!				
These loan repayments conveniently include a monthly premium of R3,95 per R1000 of the loan and a monthly administration fee of R9,50 for your optional personal protection plan.				

- 1.1 If Mr Moloke chooses to borrow R16 000 from Sanlam calculate how much he will finally repay if he takes the loan over
- 1.1.1 24 months (2)
- 1.1.2 60 months (2)
- 1.1.3 In general do you advise him to borrow for a longer or shorter time? Give a reason for your answer. (2)
- 1.2 If he chooses the 60 month option. Calculate the interest that he will pay over the period. (3)
- 1.3 The loan repayments include insurance premium and administration fees. If Mr Moloke borrows R16 000, how much of each month's payment is the premium and how much is the administration fee? (4)
- 1.4 Mr Moloke has two other options for borrowing the money.
- 1.4.1 An uncle has offered to lend him the R16 000 for five years at 18% per annum, simple interest. What would the total cost for this option at the end of the 5 years? (4)
- 1.4.2 The Standard Bank will lend him the R16 000 for five years at 16% per annum compound interest. Determine the cost of this option. (5)
- 1.5 Hence recommend to Mr Moloke which of the three options would be best. (1)
- [23]**

QUESTION 2

Tuberculosis (TB) is a lung disease which is found all over the world. The table below is an extract from the World Health Organisation (WHO) report of 2004.

World Health Organisation Statistics 2004 Estimated incidences of Tuberculosis Infection worldwide		
Region	Numbers measured in thousands	Per 100 000 of the population
Africa	2573	356
The Americas	363	41
Eastern Mediterranean	645	122
Europe	445	50
South-East Asia	2967	182
Western Pacific	1925	111
Global	8918	140

- 2.1 How many people were estimated to have TB in Europe in 2004? (1)
- 2.2 Which region had the highest number of cases in total? (1)
- 2.3 What is the range of the infection incidence per 100 000 of the population? (2)
- 2.4 Which region had the highest proportion of its people infected with TB? Explain how you know this from the table. (2)
- 2.5 Complete the sentence: 1 in every _____ people was infected with TB in 2004. Show your working. (3)
- 2.6 The infection rate in the Americas was 41 per 100 000. How many cases would you estimate for a single South American country which had a population of 2 250 000 people? (3)
- 2.7 If there was a global reduction of 10% in the number of cases of TB by the end of 2005 how many cases would there have been that year? (3)

[17]**QUESTION 3**

A family of four (mother, father and two children), are planning a trip from Cape Town to Plettenberg Bay. The questions below refer to their calculations around this trip and to a one way journey only.

They are using the map and the scale below to estimate distances for their journey.

<http://www.cape-venues.co.za/western-cape-map.htm>

- 3.1 Estimate, in kilometers, how far they will have to drive if they travel directly on the N2. (2)
- 3.2 They expect to travel at an average speed of 90km/h. It is important to stop driving approximately every 2 hours to avoid driver fatigue. How often and where should they plan to break their journey? (3)
- 3.3 If they leave at 08:00, are able to keep to their expected average speed and take 45 minutes at their stop(s), at what time could they expect to arrive in Plettenberg Bay? (5)

- 3.4 The family decide to look at hiring a car for the holiday and find this offer for a Toyota Corolla on the internet.

Manual 1.4 or 1.6, Radio Tape, Aircon,
Power Steering, Airbags

- 4 adults, 1 children
- Luggage: 2 large 3 small
- 60L fuel tank (650km range)

Mileage & Insurance Options (select an option below to book)	Car Rental Rate (per day)				
	1-6	7-13	14-30	31+	Excess
<u>STANDARD: Unlmted kms + Std Insurance</u>	252	252	245	233	4500
<u>SUPER: Unlmted kms + Super Insurance</u>	297	297	289	275	0
<u>MAX: SUPER + tank of fuel, extra driver, young driver, extra damage cover</u>	-	407	367	349	0

(source:www.drivesouthafrica.co.za)

- 3.4.1 In the MAX package a free tank of fuel is included. If petrol costs R7 per liter, what is the value of this tank of petrol? (2)
- 3.4.2 How far, on average, does the Toyota Corolla travel on one liter of petrol? (3)
- 3.4.3 The family wants to hire the car for 8 days. Determine the cost of the MAX and the STANDARD package for this hiring period. (3)
- 3.4.4 Give at least two reasons why the family might chose the more expensive option. (2)
- [20]**

- 1.1 Use the extract from the SARS tax table to determine how much tax (SITE + PAYE) Luka paid in 2006 (3)
- 1.2 All employees contribute 1% of their monthly salary to the Unemployment Insurance Fund (UIF), how much did Luka contribute to UIF each month in 2006? (4)
- 1.3 Hence, or otherwise, show that Luka's take-home salary was R7 009,51 (3)

According to market researchers, people in Luka's income bracket typically spend their money as shown in the pie chart below.

- 1.4 Assume that Luka's money is spent as shown in the graph and calculate to the nearest Rand how much of each month's take-home salary is spent on the following:

- Food
- Clothing, footwear and accessories
- Housing and electricity
- Transport

(8)

- 1.5 Refer to the table below which lists the change in CPI for each of the expenditure groups listed in the pie chart from 2006 to 2007.

By referring to your answers to 1.4, determine the missing values a to e in the table (you need only write down the values and show your calculations).

(10)

Expenditure group	Typical monthly spend by Luka in January 2006	Percentage change in CPI for expenditure group	Anticipated monthly spend by Luka in January 2007
Food	<i>see answer 1.4</i>	9,3%	a
Clothing, footwear & accessories	<i>see answer 1.4</i>	-10,9%	b
Housing & electricity	<i>see answer 1.4</i>	9,2%	c
Transport	<i>see answer 1.4</i>	6,8%	d
Medical & dental	R280,00	5,6%	R296,00
Insurance & funds	R456,00	–	R480,00
Personal care	R259,00	5,0%	R272,00
Communication	R259,00	0,2%	R260,00
Savings	R301,00	–	R395,00
Other	R1 234,00	6,9%	R1 319,00
	R7 003,00	–	e

- 1.6 Calculate the percentage change in total expenses for Luka from 2006 to 2007. (4)
- 1.7 Luka's employer offers Luka an "inflation-linked" salary increase of 5% for 2007. What would Luka's gross salary be after this increase? (3)
- 1.8 The tax formula applicable to 2007 is shown below. Use this formula and the salary you calculated in 1.7 to show that Luka's monthly take home salary after paying tax and UIF contributions will be R7 501,31. (7)

Rates applicable to individuals					
TAXABLE INCOME		RATES OF TAX			
R	R	R			R
0	— 100 000		18%	of each R1	
100 001	— 160 000	18 000	+	25%	of the amount above 100 000
160 001	— 200 000	33 000	+	30%	of the amount above 160 000
220 001	— 300 000	51 000	+	35%	of the amount above 200 000
300 001	— 400 000	79 000	+	38%	of the amount above 300 000
400 001	and above	117 000	+	40%	of the amount above 400 000

Tax Rebates

- Primary rebate R7 200
- Additional rebate (for person 65 years and older) R4 500

- 1.9 Calculate the percentage increase in take-home salary from January 2006 to January 2007 and explain in terms of tax rates why this is greater than the 5% increase that the employer gave Luka. (8)
- 1.10 By referring to Luka's anticipated expenses (question 1.5) determine whether Luka will be able to maintain the lifestyle of January 2006 in January 2007 justify your answer. (3)

[53]

QUESTION 2

The graph below compares the effective income tax rate applicable to South Africans from the 2005 to 2008 tax years.

- 2.1 What was the effective tax rate paid by a person earning R150 000 in each of the years 2005; 2006; 2007 and 2008? (4)
- 2.2 How much would a person have to earn to pay an effective tax rate of 25% in each of the years 2005; 2006; 2007 and 2008? (4)
- 2.3 How much would a person earning R100 000 in 2008 have paid in income tax? (2)
- 2.4 Describe the trend in effective income tax rate over the period 2005 to 2008 – motivate your answer. (4)

[14]

QUESTION 3

3.1 Describe in your own words what is meant by the following: “the student taking the test scored at the 75th percentile” (2)

3.2 Test results for a particular test are summarised alongside. In which quartile would a person with a total of 88 fall?

Test Scores	Frequency
66 - 70	4
71 - 75	3
76 - 80	2
81 - 85	6
86 - 90	3
91 - 95	2

(2)

Questions 3.3 and 3.4 on the next page refer to the graph below.

2 to 20 years: Boys
Body mass index-for-age percentiles

- 3.3 Body Mass Index (BMI) is a number calculated from a child's weight and height. BMI number is plotted on the CDC BMI-for-age growth charts (for either girls or boys) to obtain a percentile ranking. BMI-for-age weight status categories and the corresponding percentiles are shown in the following table.

Weight Status Category	Percentile Range
Underweight	Less than the 5 th percentile
Healthy weight	5 th percentile to less than the 85 th percentile
At risk of overweight	85 th to less than the 95 th percentile
Overweight	Equal to or greater than the 95 th percentile

- 3.3.1 At what percentile would an 8 year old boy with a BMI of 17 be? (2)
- 3.3.2 What is the BMI of a 5 year old boy if his BMI places him at the 90th percentile? (2)
- 3.3.3 Within what range can a 10 year old boy's BMI be if his weight is to be considered "healthy"? (4)

- 3.4 BMI is calculated using the formula
$$\text{BMI} = \frac{\text{weight (kg)}}{(\text{height (m)})^2}$$

- 3.4.1 What is the weight status of an 8 year old boy who is 120cm tall and who weighs 30kg? (5)
- 3.4.2 How heavy would a 16 year old boy be if he is 1,65m tall and his BMI is at the 50th percentile? (5)

[22]

QUESTION 4

Arrive Alive (www.arrivealive.co.za) publishes a large number of statistics related to fatalities (deaths) as a result of motor car accidents. The questions that follow are based on the information supplied in the tables and graphs below.

Fatalities on South African Roads 1990 to 2004			
	Number of road fatalities	South African population (millions)	Number of fatalities per 100 000 people
1990	11 157	30,6	36,46
1991	11 069	31,2	35,48
1992	10 142	31,9	31,79
1993	8 140	32,6	24,97
1994	9 981	40,4	a
1995	10 256	40,63	25,24
1996	9 848	40,58	24,27
1997	9 691	41,27	23,48
1998	9 068	41,95	21,62
1999	10 523	42,64	b
2000	not available	43,33	not available
2001	11 201	44,25	25,31
2002	12 198	45,17	27,00
2003	12 354	46,13	26,78
2004	12 727	46,59	27,32

The fatalities on the South African Roads have been reported in terms of both the actual number of fatalities and as a rate: the number of fatalities per 100 000 people in the population.

- 4.1 Consider the graph that reports the percentage of fatalities per time of day
- 4.1.1 What fraction of all fatalities occurs between 17h00 and 22h00? (4)
- 4.1.2 Why do you think there is a sharp rise in the graph around 08h00? (3)
- 4.1.3 At what times of day are you at greatest risk of being killed in a motor vehicle related accident? Substantiate your claim (4)

- 4.2 Refer to the table and graph that report on the fatalities from 1990 to 2004
- 4.2.1 Why is there a gap in each of the broken line graphs? (2)
- 4.2.2 Calculate the missing values a and b on the table. (8)
- 4.3 Calculate the change in the number of fatalities from:
- 4.3.1 1994 to 1999
- 4.3.2 1999 to 2004 (4)
- 4.4 Calculate the change in the number of fatalities per 100 000 people from
- 4.3.1 1994 to 1999
- 4.3.2 1999 to 2004 (4)
- 4.5 Consider the graphs of the two statistics and discuss which graph might be used by the Minister of Transport to support an argument that claims progress in managing road accident fatalities and which graph might be used by somebody trying to contradict the Minister. Provide a detailed motivation for your answer. (6)
- 4.6 Which statistic (actual number of fatalities or number of fatalities per 100 000) best represents the risk (likelihood) of dying in a motor vehicle related accident. Motivate your answer. (4)
- [37]**

QUESTION 5

The time line below has been developed by Luka who lives in Johannesburg and is considering attending the wedding of a friend in Maputo.

The timeline shows the four different travel options available to Luka as well as the cost (one way) and departure and arrival times for each option.

- 5.1 Approximately how long will the train (Shosholoza Meyl) and taxi option take? (2)
- 5.2 How much does the bus option cost? (1)

5.3 Explain the difference in costs between the four different options in terms of time spent traveling and convenience. (6)

5.4 Draw the following details onto the timeline provided:

Shosholoza Meyl and taxi:

- Shosholoza Meyl departs Maputo at 18:00 and arrives in JHB at 06:20;
- Taxi journey takes \approx 1hr from Maputo with taxis departing all the time

Greyhound Bus:

- Option 1 departs Maputo at 07:30 and arrives in Johannesburg at 16:30
- Option 2 departs Maputo at 19:00 and arrives in Johannesburg at 03:55

(6)

5.5 If Luka can afford to spend no more than R1800,00 on travel costs on the trip to Maputo, decide on what combination of travel options to use if Luka:

- Cannot leave work before 16:00 on Friday and must be back at work by 08:00 on Monday morning
- Wants to spend as much time as possible and at least two nights in Maputo
- Would like to be as comfortable as possible while traveling

Give detailed travel arrangements and costs for your solution.

(9)

[24]

RHS: $100x + 10x + 10y + y = 110x + 11y$ ✓

Grade 10 Mathematics: Memorandum Paper 2

- 1.1.1 $A(-2; -5) \Rightarrow A'(-2; -5)$ ✓
 1.1.2 $A(-2; -5) \Rightarrow A'(2; 5)$ ✓
 1.1.3 $A(-2; -5) \Rightarrow A'(5; -2)$ ✓ ✓
 1.2.1 $AB = \sqrt{(-3-5)^2 + (2-(-1))^2}$
 $= \sqrt{73}$ ✓ ✓
 $= 8,54 \text{ units}$
 1.2.2 $M = \left(\frac{-3+5}{2}; \frac{2-1}{2} \right)$ ✓
 $= \left(1; \frac{1}{2} \right)$ ✓
 1.2.3 If $m_{BC} = 2$
 $m_{BC} = \frac{p-(-1)}{2-5} = 2$ ✓ ✓
 $p+1 = -6$
 $p = -7$ ✓
 1.3.1 $\sin 53,14^\circ = \frac{AB}{20}$ ✓
 $\therefore AB = 20 \times \sin 53,14^\circ$
 $= 16 \text{ m}$ ✓
 1.3.2 $\tan 53,14^\circ = \frac{AB}{BC}$ ✓
 $\therefore BC = \frac{AB}{\tan 53,14^\circ} = \frac{16}{\tan 53,14^\circ}$ ✓
 1.4.1 $V = 18 \times 5 \times x$ ✓
 $= 90x \text{ cm}^3$ ✓
 1.4.2 New $V = 2 \times (18 \times 5) \times x$
 $\therefore \text{new breadth} = 2x$ ✓
 1.5.1 Mean = $\frac{63+32+34+64+32+27+35}{7}$ ✓
 $= 41$ ✓
 1.5.2 Mode = 32 ✓ (it occurs most often)
 1.5.3 Ages in order: 27; 32; 32; 34; 35; 63; 64 ✓
 Median = 34 ✓
 1.5.4 63 ✓ ✓
 2.1
- 
- $AB = 5 \text{ units (since } m_{AB} = 0)$ ✓
 $BC = \sqrt{(-1-1)^2 + (6-2)^2}$ ✓
 $= \sqrt{20}$ ✓
 2.2 $\triangle ABC$ isosceles ✓ because $AB = AC$ ✓

- 2.3 Solution 1:
 For $\triangle ABC$ isosceles to be a right angled isosceles triangle the two equal angles must be 45° ✓. In a triangle the longest side is always opposite the largest angle ✓ so in this triangle the longest side should be opposite the 90° . ✓ However, $\sqrt{20} < 5$, ✓ so $\triangle ABC$ cannot be a right angled isosceles triangle. ✓
 Or solution 2:
 $AB = AC$,
 \therefore if $\triangle ABC$ is right-angled, $\hat{A} = 90^\circ$ ✓
 $m_{AC} = \frac{6-2}{-1-(-4)} = \frac{4}{3}$ ✓
 $m_{AB} = 0$ ✓
 $m_{AB} \cdot m_{AC} \neq -1 \therefore \hat{A} \neq 90^\circ$ ✓
 $\therefore \triangle ABC$ is NOT right-angled ✓
 2.4 $E = \left(\frac{x-1}{2}; \frac{y+6}{2} \right) = (2\frac{1}{4}; 7)$
 $\therefore \frac{x-1}{2} = \frac{9}{4}$ and $\frac{y+6}{2} = 7$ ✓
 $x-1 = \frac{9}{2}$ $y+6 = 14$
 $x = \frac{11}{2}$ (or $5\frac{1}{2}$) $y = 8$
 $\therefore D = (5\frac{1}{2}; 8)$ ✓ ✓
 2.5 $m_{AC} = \frac{6-2}{-1-(-4)} = \frac{4}{3}$ ✓
 $m_{AB} = 0$ ✓
 $m_{BD} = \frac{8-2}{5\frac{1}{2}-1} = \frac{4}{3}$ ✓
 $m_{CD} = \frac{8-6}{5\frac{1}{2}-(-1)} = \frac{4}{13}$ ✓
 $\therefore ABDC$ is a trapezium ($AC \parallel BD$) ✓
 3.1.1 $\Delta 2$ is the reflection of $\Delta 3$ in the y -axis (and vice versa). ✓ ✓
 3.1.2 $\Delta 1$ is the reflection of $\Delta 2$ in the x -axis (and vice versa). ✓ ✓
 3.1.3 $\Delta 2$ is the reflection of $\Delta 4$ in the line $y = x$ (and vice versa). ✓ ✓
 3.2.1 $\Delta 3$ has been translated 2 units left and 1 unit up. ✓ ✓

3.2.2

- 4.1 Vol_{Type B} = 2 × Vol_{Type A} ✓ ✓
 4.2 Vol_{Type C} = 4 × Vol_{Type A} ✓ ✓
 4.3 He must make the height four time as high. ✓ ✓
 4.3 SA = 2(5×5) + 20 × 11 ✓ ✓
 = 270 cm² ✓
 5.1 $\tan 3^\circ = \frac{h}{2.9}$ ✓ ✓
 $\therefore h = 2.9 \times \tan 3^\circ$ ✓
 $\therefore h = 0,15\text{m}$ ✓
 5.2 $\sin \theta = \frac{1.4}{2.8}$ ✓ ✓
 $\theta = 30^\circ$ ✓ ✓
 5.3 Third side = $\sqrt{2,8^2 - 1,4^2}$ (pythag) ✓
 = 2,43m ✓
 The roof is symmetrical \therefore
 width = 2 × 2,43
 width of house is 4,86m ✓
 5.4 $\tan 15^\circ = \frac{h}{2.9}$ ✓
 $\therefore h = 2.9 \times \tan 15^\circ$
 $\therefore h = 0,78\text{m}$ ✓
 Impact: 0,78m ÷ 0,15m = 5,18 ✓ ✓
 h becomes about 5,2 times larger.

1.4.1	$g(x)$ ✓	1	3.1.1	The 1 st year ✓	1
1.4.2	$x = -1$ ✓ or $x = 3$ ✓	2	3.1.2	$V = 100\,000(1 - 0,13)^5 = R49\,842,09$ ✓ ✓ ✓	3
1.4.3	$y = 1$ ✓	1	3.1.3	$A = 100\,000(1 + 0,08)^5 = R146\,932,81$ ✓ ✓ ✓	3
1.4.4	$y > 0$ ✓	1	3.1.4	Amount needed = $A - V = R\,97\,090,72$ ✓	1
1.4.5	x -axis (only 1 mark) $y = 0$ ✓ ✓ Asks for an equation	2	3.2.1	Option A: $I = 0,145 \times 10\,000 = R\,1\,450$ ✓	
1.4.6	$x = 1$ ✓	1		Option B: $I = 10\,000(1 + \frac{0,14}{12})^{12} - 10\,000$ $= R\,1\,493,42$ ✓ ✓ Thus Option B is better ✓ OR	
1.5.1	A (120° ; 1) ✓ ✓	2		$1 + i_e = (1 + \frac{0,14}{12})^{12}$ $\therefore i_e = 14,93\%$	4
1.5.2	D (-180° ; 0,5) ✓ ✓ Using periodicity E(60° ; 0,5) ✓ ✓ Using symmetry about $x = 120^\circ$ C(-300° ; 0,5) ✓ ✓ Using periodicity	6	3.2.2	Option A: $I = 0,075 \times 10\,000 = R\,750$ ✓ Option B: $I = 10\,000(1 + \frac{0,14}{12})^6 - 10\,000 =$ $R\,720,69$ ✓ ✓ Yes, option A is better ✓ ✓ OR	
1.5.3	$y = -0,5$ ✓	1		Option A: $i = \frac{14,5}{2}\% = 7,25\%$ ✓	
1.5.4	Amplitude = 1 ✓	1		Option B: $(1 + i_6) = (1 + \frac{0,14}{12})^6$ ✓ ✓ $\therefore i_6 = 7,21\%$ Yes, option A is better ✓ ✓	
1.6.1	$\frac{x+2}{6} = \frac{1}{2}$ $\therefore x + 2 = 3$ ✓ $\therefore x = 1$ ✓	2	4.1	$x = 7$ ✓	1
1.6.2	$\frac{(x-2)(x+2)}{2(x-2)} = 7$ ✓ ✓ $\therefore x + 2 = 14$ ✓ $\therefore x = 12$ ✓	4	4.2.1	$f(x) = -(x^2 - 2x - 3) = -(x-3)(x+1)$ ✓	3
1.6.3	$(x+5)(x-3) = 0$ ✓ ✓ $\therefore x = -5$ ✓ or $x = 3$ ✓	4			
1.6.4	 Sketch not necessary $\therefore x < -2$ ✓ or $x > 2$ ✓	3			

	The roots are $x = 3$ or $x = -1$ ✓ ✓	
4.2.2	Axis of symmetry: $x = \frac{3+(-1)}{2}$ $= 1$ ✓ ✓	2
4.2.3	$x = 1 \therefore f(1) = -1 + 2 + 3 = 4$ ✓ Thus TP (1 ; 4) ✓ (must write in co-ordinate form)	2
4.3.1	$4 = \frac{a}{1} \therefore a = 4$ ✓	1
4.3.2	Everywhere except at $x = 0$ ✓ ✓ OR $x \in R$ but $x \neq 0$	2
4.3.3	$\frac{4}{x} = x - 1$ ✓ $\therefore x^2 - x - 4 = 0$ ✓ $\therefore x = \frac{1 \pm \sqrt{1+16}}{2}$ ✓ $\therefore x = 2,56$ because $x > 0$ ✓ Thus P (2,56 ; 1,56) ✓	5
4.3.4	$f(2,56) = -(2,56)^2 + 2(2,56) + 3 = 1,56$ ✓ Thus P also lies on the parabola ✓	2
4.4	$h(x) > g(x)$ x -coordinate of T = $\frac{1 - \sqrt{17}}{2} = -1,56$ ✓ $\therefore x < -1,56$ ✓ or $0 < x < 2,56$ ✓ ✓	4
5.1	A(-1,5; -3) ✓ and B (0,5; -5) ✓ (substitute into formula)	2
5.2	Average gradient = $\frac{-5 - (-3)}{0,5 - (-1,5)} = -1$ ✓ ✓	2
5.3	Axis of symmetry is the average of the roots thus $x = -0,25$ ✓ ✓ Thus $f(x)$ is increasing on $x > 0,25$ ✓	3
5.4	For average gradient to be 0, C must have same y -coordinate as A, ✓ Thus C(1; -3) ✓	2
5.5	By inspection: D(1,5; 0) ✓ ✓	2
6.1		3
6.2	$4500 = A(1 - 0,1)^1$ ✓ ✓ $\therefore A = 5000$ ✓	3
6.3	$5000(1 - 0,1)^x = 2500$ ✓ $\therefore 0,9^x = 0,5$ ✓ By trial and error: $0,9^6 = 0,53$ ✓	5

	$0,9^7 = 0,48$ ✓	
	Thus during the 7 th day. ✓	
7.1	$\frac{3}{x+2} - \frac{x+5}{(x-2)(x+2)} = 3$ ✓ $3(x-2) - (x+5) = 3(x^2-4)$ ✓ ✓ $3x-6-x-5 = 3x^2-12$ $3x^2-2x-1 = 0$ $(3x+1)(x-1) = 0$ ✓ $x = -\frac{1}{3}$ ✓ or $x = 1$ ✓	6
7.2	$x + y + 7 = 0$ thus $x = -y - 7$ ✓ $(-y-7)^2 + y^2 = 25$ ✓ $y^2 + 14y + 49 + y^2 = 25$ $y^2 + 7y + 12 = 0$ ✓ $(y+3)(y+4) = 0$ ✓ $\therefore y = -3$ or $y = -4$ ✓ If $y = -3$ then $x = -4$ If $y = -4$ then $x = -3$ ✓	7
8.1	a) $1 \leq x \leq 3$ ✓ ✓ b) $y \leq -2x + 10$ ✓ ✓ c) $y \geq 0,5x$ ✓ ✓	6
8.2	A (1; 8) then $P = 9$ ✓ B (3; 4) then $P = 7$ ✓ Thus $P = 9$ is a maximum at point P ✓	3
8.3	If gradient of T < gradient of AB then B is the point that would give a maximum. ✓ ✓	
	Thus $k < -2$ ✓	3

Grade 12 Mathematics: Memorandum Paper 1

1.1.1	$x = 9$ ✓	1	2.2.2	$ S_{\infty} - S_n =$	
1.1.2	$x = 27$ ✓	1		$\left \frac{10}{1 - \frac{1}{2}} - \frac{10 - \left(1 - \left(\frac{1}{2}\right)^n\right)}{1 - \frac{1}{2}} \right $ ✓	
1.1.3	$2x - 1 = 0$ ✓	2		$= \left 20 - 20 \left(1 - \left(\frac{1}{2}\right)^n\right) \right $	
	$\therefore x = \frac{1}{2}$ ✓	2		$\therefore 20 \left(\frac{1}{2}\right)^n < 0,01$	
1.2	$6 + 8 + 10 + 12 + 14 = 50$ ✓ ✓	3		$\therefore \left(\frac{1}{2}\right)^n < 0,0005$ ✓ ✓ ✓	
1.3	$S_5 = \frac{5}{2}(1 + 5) = 15$ ✓	3		$\therefore n > \frac{\log 0,0005}{\log 0,5}$	
	$S_4 = \frac{4}{2}(1 + 4) = 10$ ✓			$\therefore n > 10,966$	
	$\therefore T_5 = 15 - 10 = 5$ ✓			$\therefore n = 11$	4
1.4	$a = 64$ and $r = 1,5$ ✓ ✓	4	2.3	From AP:	
	$\therefore T_7 = 64 \left(\frac{3}{2}\right)^6 = 729$ ✓	1		$b - a = (a - b) - b$ ✓	
1.5	$2 = (1,087)^n$ ✓	1		$\therefore 3b = 2a$	
	$\therefore n = \log_{1,087} 2 = 8,3$ ✓	2		$\therefore b = \frac{2}{3}a$ ✓	
	Thus during the 9 th year ✓	2		From GP:	
1.6	$f(x) = x^2(x - 1) - 4(x - 1)$ ✓	2		$\frac{a - b}{a} = \frac{1}{a - b}$ ✓	
	$= (x - 1)(x - 2)(x + 2)$ ✓	3		$\therefore (a - b)^2 = a$	
	Thus $x = 1$ or $x = 2$ or $x = -2$ ✓ ✓ ✓	3		$\therefore (a - \frac{2}{3}a)^2 = a$ ✓	
1.7.1	$x = 5$ ✓	4		$\therefore (\frac{1}{3}a)^2 = a$	
1.7.2	y- intercept is $y = -0,2$ ✓	2		$\therefore \frac{1}{9}a^2 - a = 0$	
1.7.3	$x - 5 = -1$ ✓	2		$\therefore a^2 - 9a = 0$	
	Thus $x = 4$ ✓	2		$\therefore a(a - 9) = 0$ ✓	
1.7.4	$y = x - 5$ OR $y = -x + 5$ ✓ ✓	3		$\therefore a = 0$ or $a = 9$	
1.8	$x = 2y - 4$ ✓	4		$\therefore b = \frac{2}{3} \times 9$	
	Thus $y = (x + 4)/2$ ✓	2		$\therefore b = 6$ ✓	6
	Thus $f(x) = \frac{x}{2} + 2$ ✓	2	2.4	$3! + 4! + 5! = 3!(1 + 4 + 4 \times 5)$ ✓ ✓	3
1.9	C ✓ ✓	2		$= 150$ ✓	1
1.10	$f(x) = x^3$ ✓ ✓ (may include a constant)	3	3.1.1	Net salary = $0,75 \times 8250 = R6187,50$ ✓	1
1.11	Distance = $\frac{1}{4} \times 60 + \frac{3}{4} \times 80$ ✓ ✓	4	3.1.2	Bond repayments:	
	$= 15 + 60 = 75$ km ✓	2		$0,3 \times 6187,50 = R1856,25$ ✓	1
2.1	$100\,000 = 5\,000(1,15)^t$ ✓ ✓	3	3.1.3	$i = \frac{0,135}{12}$ ✓	
	$\therefore 20(1,15)^t$			$n = 20 \times 12 = 240$ ✓	
	$\therefore t = 21,43$ ✓			$A = 1\,856,25 \left(\frac{1 - (1 + i)^n}{i} \right)$ ✓	
2.2.1	Thus 21 hours and 26 minutes ✓			$A = R\,153\,742,66$ ✓ ✓	
	$S_8 = \frac{a(1 - r^n)}{1 - r}$	3		Thus you can afford the flat. ✓	6
	$S_8 = \frac{10 \left(1 - \frac{1}{2}\right)}{1 - \frac{1}{2}} = 20 \left(1 - \frac{1}{2}\right)$ ✓ ✓ ✓				
	$= 19,92$				

3.2	$i = \frac{0.1}{12}$ ✓				
	$20000 = 300 \left(\frac{(1+i)^n - 1}{i} \right)$ ✓				
	$\therefore (1+i)^n = \frac{14}{9}$ ✓				
	$\therefore \log_{(1+i)} \frac{14}{9} = n$ ✓				
	Thus $n = 53,2$ months				
	Thus need 54 months ✓				
4.1.1	$f(0) = a \times b^0 = 2$ ✓				
	$\therefore a = 2$				
	$f(1) = 2b^1 = 6$ ✓				
	$\therefore b = 3$				
	$\therefore f(x) = 2 \cdot 3^x$ ✓				
4.1.2	$g(0) = a \times b^0 = 2$ ✓				
	$\therefore a = 2$				
	$g(2) = 2b^2 = 17$				
	$\therefore b^2 = 8,5$ ✓				
	$\therefore b = 2,92$				
	$\therefore g(x) = 2 \cdot (2,92)^x$				
4.1.3	$f(2,3) = 25,03$				
	$f(6) = 1458$ ✓				
	$g(2,3) = 23,52$				
	$g(6) = 1239,72$ ✓				
4.1.4	$f(x)$ ✓ is the closer approximation as the values of $f(2,3)$ and $f(6)$ are closer to the collected data than those of $g(2,3)$ and $g(6)$. ✓				
4.2.1	$f(x) = (x+3)(x-1)$ ✓				
	$\therefore x = -3$ ✓ or $x = -1$ ✓				
4.2.2	$E = 3 - 6 = -3$ $E(0; -3)$ ✓				
4.2.3	$g(x) = (x^2 + 4x + 3)(2x - 1)$ ✓				
	$\therefore g(x) = 2x^3 + 7x^2 + 2x - 3$ ✓ ✓				
4.2.4	$(x^2 + 4x + 3) = (x^2 + 4x + 3)(2x - 1)$ ✓				
	$\therefore (2x - 1 - 1)(x^2 + 4x + 3) = 0$ ✓				
	$\therefore x = 1$ ✓				
	$\therefore K(1; 8)$ ✓				
4.2.5	$g'(x) = 6x^2 + 14x + 2 = 0$ ✓				
	$\therefore x = \frac{-7 \pm \sqrt{37}}{6}$ ✓				
	$\therefore x = -2,18$ or $x = -0,15$ ✓				
	Axis of symmetry of $f(x)$ is $x = -2$ ✓				
	Thus F does not lie on the axis of symmetry of $f(x)$. ✓				
4.2.6	$f'(x) = g'(x)$ ✓				
	$\therefore 2x + 4 = 6x^2 + 14x + 2$ ✓				
	$\therefore 6x^2 + 12x - 2 = 0$ ✓				
	$\therefore 3x^2 + 6x - 1 = 0$				
	$\therefore x = \frac{-6 \pm \sqrt{36 - 4 \times 3 \times (-1)}}{6}$ ✓				
	$\therefore x = 0,15$ ✓ or $x = -2,15$ ✓				
5.1	Line 5 ✓				
	Can't ÷ by $(a - b)$ because $a - b = 0$ ✓ ✓				3
5.2.1	$f(x) = (x-2)(2x^2 + 5x + 3)$ ✓				
	By factor theorem or inspection				
	$\therefore f(x) = (x-2)(2x+3)(x+1)$ ✓				
	$\therefore x = 2$ ✓ or $x = -1,5$ ✓ or $x = -1$ ✓				5
5.2.2	$x - 2 = 2$ $x = 4$				
	Thus $x - 2 = -1,5$ thus $x = 0,5$ ✓ ✓ ✓				
	$x - 2 = -1$ $x = 1$				3
6.1	$f'(x) = \lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$ ✓				
	$\frac{1}{x+h-2} - \frac{1}{x-2}$				
	$\therefore f'(x) = \lim_{h \rightarrow 0} \frac{x+h-2}{h} \frac{1}{x+h-2} - \frac{1}{x-2}$ ✓				
	$\therefore f'(x) = \lim_{h \rightarrow 0} \frac{(x-2) - (x+h-2)}{(x-2)(x+h-2)h}$ ✓				
	$\therefore f'(x) = \lim_{h \rightarrow 0} \frac{-1}{(x-2)(x+h-2)}$ ✓				
	$\therefore f'(x) = \frac{-1}{(x-2)^2}$ ✓				5
6.2	$y = x^2 + 2x^{-0.5} - 3x^{-1}$ ✓ ✓				
	$\therefore \frac{dy}{dx} = 2x - x^{-1.5} + 3x^{-2}$ ✓ ✓ ✓				5
6.3.1	$f'(0) = 2$ thus gradient of tangent is 2 ✓				1
6.3.2	Increasing implies that $f'(x) > 0$ ✓				
	$\therefore -x^2 - x + 2 > 0$				
	$\therefore (x+2)(x-1) < 0$ ✓				
	$\therefore -2 < x < 1$ ✓ ✓				4
6.4.1	$3 = 2m + c$ ✓				
	$\therefore c = 3 - 2m$ ✓				2
6.4.2	$y = mx + (3 - 2m)$				
	Thus x -intercept is when $y = 0$ ✓				
	$\therefore x = \frac{3-2m}{m}$ ✓				2
6.4.3	Area = $0,5$ (x -intercept)(y -intercept) ✓				
	$= \frac{1}{2} \left(\frac{3-2m}{m} \right) (3-2m)$ ✓				2
6.4.4	Multiply out above expression to get				
	Area = $\frac{9}{2}m^{-1} - 6 + 2m$ ✓				
	Thus $\frac{dA}{dx} = -\frac{9}{2m^2} + 2 = 0$ ✓				
	$m^2 = \frac{9}{4}$ ✓				
	$m = \pm \frac{3}{2}$ ✓				
	But $m < 0$ thus $m = -\frac{3}{2}$ ✓				5

7.1 Twice as much labour as bootleg, thus
 $500 \div 2 = 250$ straight leg jeans. ✓ 1

$x \leq 150$ ✓

$y \leq 250$ ✓

$2x + y \leq 500$ ✓

Correct feasible region ✓ ✓ 5

7.3 $P = 8x + 5y$ ✓

Point A (125; 250) ✓ and B(150 ; 200) ✓

By substituting points into profit function
 get maximum profit at A ✓ = R 2 250 ✓ 5

7.4 $P = 11x + 5y$ ✓

Thus to maximize profit now use point B
 (by substitution)

Thus 150 straight leg and 200 bootleg ✓ 2

$OA = \sqrt{4^2 + 7^2} = \sqrt{65} \checkmark$

$OA' = \sqrt{(-8)^2 + 1^2} = \sqrt{65} \checkmark$

$AA' = \sqrt{(4 - (-8))^2 + (7 - 1)^2}$

$= \sqrt{180} = 6\sqrt{5} \checkmark$

Using the cos rule:

$(6\sqrt{5})^2 = (\sqrt{65})^2 + (\sqrt{65})^2 - 2.$

$\sqrt{65} \sqrt{65} \cdot \cos \theta \checkmark$

$180 = 130(1 - \cos \theta)$

$\therefore \frac{180}{130} - 1 = -\cos \theta$

$\therefore \cos \theta = -\frac{5}{13} \checkmark$

$\therefore \theta = 112,62^\circ \checkmark$

1.2.2 $B' = (8\cos 112,62^\circ - 14\sin 112,62^\circ; 8\sin 112,62^\circ + 14\cos 112,62^\circ) \checkmark \checkmark$
 $= (-16; 2) \checkmark \checkmark$

1.3.1 $\tan x = -0,3421 \checkmark$
 $\therefore x = -18,89^\circ \checkmark$

1.3.2 $\sin x = 0,500 \checkmark$
 $\therefore x = 30^\circ$

1.4 $y = 4\sin 5x \checkmark \checkmark$

1.5.1 $< 39 \text{ minutes} \checkmark \checkmark$

1.5.2 $16\% \times 590 \text{ runners} = 94 \text{ runners} \checkmark \checkmark \checkmark$
(can accept answers in the range of 94 to 106 runners)

1.5.3

Appropriate scale ✓
Correct drawing ✓
Correct min and max values for the range ✓
Correct values for the median etc ✓ ✓
The values can be out by 1 unit on either side.

2.1.1 Let the centre = $(a; b)$

$$a = 2 \quad \checkmark$$

$$(x-2)^2 + (y-b)^2 = r^2$$

Sub in $(2;0)$

$$(2-2)^2 + (0-b)^2 = r^2 \quad \checkmark$$

$$\therefore b^2 = r^2 \quad \checkmark$$

Sub in $(4; -6)$

$$(4-2)^2 + (-6-b)^2 = b^2 \quad \checkmark$$

$$\therefore 4 + 36 + 12b + b^2 = b^2 \quad \checkmark$$

$$\therefore 40 + 12b = 0$$

$$\therefore b = -\frac{10}{3} \quad \checkmark$$

$$\text{Centre} = \left(2; -\frac{10}{3}\right)$$

$$(x-2)^2 + \left(y + \frac{10}{3}\right)^2 = 4 \quad \checkmark$$

2.1.2

$$m_{MB} = \frac{-3\frac{1}{3} - (-6)}{2-4} = -\frac{4}{3} \quad \checkmark$$

$$\therefore M_{\text{tangent}} = \frac{3}{4} \quad \checkmark$$

$$\text{Tangent: } y = \frac{3}{4}x + c$$

Sub in $(4; -6)$

$$-6 = \frac{3}{4}(4) + c \quad \checkmark$$

$$-9 = c$$

$$\text{Tangent: } y = \frac{3}{4}x - 9 \quad \checkmark$$

2.2.1

$$y = 5 - 2x$$

$$x^2 + (5-2x)^2 - 12x - 6(5-2x) + 20 = 0 \quad \checkmark$$

$$x^2 + 25 - 20x + 4x^2 - 12x - 30 + 12x + 20 = 0$$

$$5x^2 - 20x + 15 = 0 \quad \checkmark$$

$$x^2 - 4x + 3 = 0$$

$$\therefore (x-3)(x-1) = 0 \quad \checkmark$$

$$\therefore x = 3 \quad x = 1 \quad \checkmark$$

$$y = 5 - 2(3) \quad y = 5 - 2(1) \quad \checkmark$$

$$\therefore y = -1 \quad y = 3 \quad \checkmark$$

\therefore Points of intersection are:

$(3; -1)$ and $(1; 3)$

2.2.2

$$AB = \sqrt{(3-1)^2 + (-1-3)^2} \quad \checkmark \quad \checkmark$$

$$AB = \sqrt{4+16}$$

$$AB = \sqrt{20}$$

$$AB = 2\sqrt{5} \quad \checkmark$$

2.2.3

$$m_{BC} = \frac{-1-3}{3-1} = \frac{-4}{2} = -2 \quad \checkmark$$

$$m_{\text{perp}} = \frac{1}{2} \quad \checkmark$$

$$\text{Midpoint of AB} = \left(\frac{1+3}{2}; \frac{3-1}{2}\right) = (2; 1) \quad \checkmark$$

$$\text{Perpendicular bisector: } y = \frac{1}{2}x + c$$

$$\text{Sub } (2; 1): 1 = \frac{1}{2}(2) + c \quad \checkmark$$

$$\therefore c = 0$$

$$\therefore y = \frac{1}{2}x \quad \checkmark$$

2.2.4

The x -intercepts of the circle are found by:

$$x^2 - 12x + 20 = 0 \quad \checkmark$$

$$\therefore (x-10)(x-2) = 0 \quad \checkmark$$

$$\therefore x = 10 \text{ or } x = 2 \quad \checkmark$$

$\therefore x = 6$ is the perpendicular bisector of the x -intercepts \checkmark

$$\therefore \text{the } x \text{ value of the centre} = 6 \quad \checkmark$$

$$\therefore y = 3 \quad \checkmark$$

The centre of the circle = $(6; 3)$

3.1.1

$(5; 1) \quad \checkmark \quad \checkmark$ p is 1 unit from C to the line $x = 4$, so the point C' will be 1 unit from $x = 4$ on the other side i.e. 5. The y -value (q) remains the same. \checkmark

3.1.2

$(12; 4) \quad \checkmark \quad \checkmark$ r is 3 units from C' to the line $x = 9$, so the point C'' will be 3 units from $x = 9$ on the other side i.e. 12. The y -value (s) remains the same. \checkmark

3.1.3

A translation 10 units right. \checkmark Triangle ABC has remained in the same horizontal plane but has moved 10 units along. \checkmark

3.1.4

If point $A(1; 3)$ is reflected about the $x = 9$, it will become $A' = (17; 3)$. \checkmark If A' is then reflected about the $x = 4$ line, it will become $A'' = (-9; 3)$. \checkmark This is not the same result as above. \checkmark

3.2.1

If $A = (4; 3)$ then $A' = (3; 4) \quad \checkmark \quad \checkmark$ and $A'' = (-3; 4) \quad \checkmark$

3.2.2

Rotation of 90° :

$$A'' = (4\cos 90^\circ - 3\sin 90^\circ; 4\sin 90^\circ + 3\cos 90^\circ) \quad \checkmark \quad \checkmark$$

$$A'' = (4 \times 0 - 3 \times 1; 4 \times 1 + 3 \times 0) \quad \checkmark \quad \checkmark$$

$$A'' = (-3; 4)$$

4.1.1

$$\frac{\sin 2\theta \cos \theta + \cos 2\theta \sin \theta}{1 + 2(\cos^2 \theta - 1)} \quad \checkmark \quad \checkmark$$

$$\frac{2\sin \theta \cos \theta \cos \theta + (2\cos^2 \theta - 1)\sin \theta}{4\cos^2 \theta - 1} \quad \checkmark \quad \checkmark$$

$$\frac{\sin \theta (2\cos^2 \theta + 2\cos^2 \theta - 1)}{4\cos^2 \theta - 1} \quad \checkmark$$

- $= \sin \theta \checkmark$
- 4.1.2 If $\theta = 60^\circ$ then $1 + 2 \cos 2\theta = 0 \checkmark$ and the denominator will be zero which makes the identity undefined. \checkmark
- 4.1.3 120° or $240^\circ \checkmark$
- 4.2 In $\triangle TAB$:
 $\hat{ATB} = 180^\circ - (\theta + \beta) \checkmark$
 $\frac{AT}{\sin \theta} = \frac{x}{\sin(180^\circ - (\theta + \beta))} \checkmark$
 $\therefore AT = \frac{x \sin \theta}{\sin(\theta + \beta)} \checkmark$
- In $\triangle TAC$:
 $TC = AT \sin \alpha \checkmark$
 $\therefore TC = \frac{x \sin \theta \sin \alpha}{\sin(\theta + \beta)} \checkmark$
- 5.1 $f(180) = 1,2 \cos 0^\circ + 6,66 \checkmark$
 $= 7,86$
 $0,86 \times 60 \text{ minutes} = 51,6 \text{ minutes} \checkmark$
Time for sunrise = 7:52 which is the time recorded in the table. \checkmark
- 5.2 $f(60) = 1,2 \cos(60^\circ - 180^\circ) + 6,66 \checkmark$
 $= 6,06$
 $0,06 \times 60 \text{ minutes} = 3,6 \text{ minutes} \checkmark$
Time for sunrise = 06:04.
Actual sunrise is at 06:33.
Difference is about 29 minutes. \checkmark
- 5.3 Earliest = 17:44 = 17,733 \checkmark
Latest = 20:01 = 20,016 \checkmark
 $\therefore 20,016 - 17,733 = 2,283 \checkmark$
- 5.4 a is the amplitude of the cos graph which will be half of the time between the earliest and the latest sunset i.e. $2,283 \div 2 = 1,142 \checkmark \checkmark$
 p represents a horizontal shift which has not occurred therefore $p = 0 \checkmark$
 q is the amount that the graph has been shifted upwards and is calculated by : the minimum value + the amplitude of the graph
 $= 17,733 + 1,142 = 18,875 \checkmark$
- 5.5 $g(285) = 1,142 \cos(285^\circ - 180^\circ) + 18,875 \checkmark$
 $= 18,58$
 $0,58 \times 60 \text{ minutes} = 34,8 \text{ minutes} \checkmark$
Time for sunset = 18:39
Actual sunset is at 18:57
Difference is about 22 minutes. \checkmark
- 5.6 $h(x) = 1,142 \cos x + 18,875 - (1,2 \cos(x - 180^\circ) + 6,66) \checkmark$
 $h(x) = 1,142 \cos x + 1,2 \cos x + 12,215$
 $h(x) = 2,342 \cos x + 12,215 \checkmark$
- 5.7 a 1st and 360th day $\checkmark \checkmark$
b 180th day $\checkmark \checkmark$
- 5.8 Predicted:
 $h(75) = 2,342 \cos 75 + 12,215 \checkmark$
 $= 12,82 \text{ hours} \checkmark$
 $= 12 \text{ hours } 49 \text{ min}$

Actual:
 $19:04 - 06:46 = 12 \text{ hrs } 18 \text{ min} \checkmark$
Differs by about 31 minutes \checkmark

- 6.1.1 If the house price was R175 000 then the percentile rank would be $= (0,1 + 0,5 + 1,7 + 4,4 + 9,2 + 15 + 19,1 + 19,1 + 15)\% \approx 84\% \checkmark \checkmark$
This means that 84% of the houses were sold for less than R175 000 and 16% of the houses were sold for more than R175 00. $\checkmark \checkmark$
- 6.1.2 The difference between one standard deviations on either side of the mean $= (15 + 19,1 + 19,1 + 15)\% = 68,2\% \checkmark \checkmark$
This means that 68,2% of the houses were in the price range of R125 000 and R175 000. $\checkmark \checkmark$
Mrs Hlope is therefore correct in saying that most of the house were sold between R125 000 and R175 000. \checkmark
- 6.2.1 $SD = \sqrt{\frac{\sum (x - \bar{x})^2}{n - 1}} = 16,08 \checkmark \checkmark$
- 6.2.2 $46,62 \leftarrow 62,7 \rightarrow 78,78 \checkmark \checkmark$
 $\therefore \frac{17}{20} = 85\% \text{ scored within one standard deviation.} \checkmark$
- 6.2.3 It is not a normal distribution as we would expect only $\approx 68,2\%$ of the students to fall within one standard deviation. $\checkmark \checkmark$
- 7.1 A, the line is above all the points. $\checkmark \checkmark$
- 7.2 E \checkmark
- 7.3 D, the line goes above the points for lighter eggs and below the point for heavier eggs. $\checkmark \checkmark$
- 7.4 B \checkmark
- 7.5 C, the line goes through the majority of the points. $\checkmark \checkmark$

7.4 $13\% \times 132$ ✓ ✓

= 17 people ✓

3

7.5 HIV prevalence in females = 33,5% ✓

HIV prevalence in males

= 44,5% - 33,5% ✓

= 11% ✓

⇒ HIV prevalence was about 22,5% higher in females aged between 25 and 29, than in males. ✓

4

8.1 $A^2 = 3,000^2 + 1,200$ ✓ ✓ ⇒ $A = 3,606m$ ✓

3

8.2 The instrument used to measure the dimensions was probably a tape measure, which measures accurately to the nearest millimeter. ✓

When working with meters, three decimal places *is* a millimeter, because a millimeter is one thousandth of a meter. ✓

2

8.3.1 Surface area

= $6,000 \times 10,000$ ✓ ✓

= $60,000m^2$ ✓

3

8.3.2 $150mm \equiv (150 \div 1000)m = 0,150m$ ✓

1

8.3.3 Volume = area of base \times height

= $60,000 \times 0,150$ ✓ ✓

= $9,000m^2$ ✓

3

8.3.4 Number of bags of cement

= $9,000 \times 5$ ✓

= 45 ✓

2

8.3.5 Cost of cement

= $45 \times R55,99$ ✓

= R2 519,55 ✓

2

Grade11 Mathematical Literacy: Memorandum Paper 2

1.1 R3 000 to pay for bicycle and franchise fee. ✓

1.2 R3,50 for ice creams
R0,50 for spoon and serviettes
R0,05 franchise fee

1.3 R10,00 per ice cream. ✓ Variable ✓

1.4 $R25 + 30(R3,50) + 30(R0,50) + 30(R0,05)$
✓ ✓
 $= R25 + 30(R4,50)$
 $= R160$ ✓

1.5 a $R3\ 000 + 8 \times (R25 + 30(R4,50))$ ✓ =
R4 280 ✓

b $R3\ 000 + 15 \times (R25 + 30(R4,50))$ ✓
= R5 400 ✓

c $R3\ 000 + 30 \times (R25 + 30(R4,50))$ ✓
= R7 800 ✓

1.6 a 8 days \times 30 ice-creams \times R10 ✓
= R2 400 ✓

b 15 days \times 30 ice-creams \times R10
= R4 500 ✓

c 30 days \times 30 ice-creams \times R10
= R9 000 ✓

1.7

Graph labels ✓

Expense graph ✓ ✓

Income graph ✓ ✓

Appropriate scale ✓

1.8.1 For 30 ice-creams per day: about 20 days ✓

For 60 ice-creams per day: about 10 days ✓

1.8.2 30 ice-creams per day: after about 30 days
60 ice-creams per day: after about 18 days ✓

2.1 Scale of diagram: Using 1,8cm represents
45cm, you get a scale of 1:25 ✓
Dimensions of lid on the drawing: 1,1cm by
0,8cm ✓ ✓

Dimensions of lid: 27,5cm by 20cm ✓ ✓

2.2 External dimensions: 80cm \times 46cm \times 45cm
But $2 \times 8\text{cm} = 16\text{cm}$ must be subtracted
from each side ✓

Internal dimensions: 64cm \times 30cm \times 29cm
✓ ✓ ✓

2.3 Let $\pi = 3,14$

$\text{Vol} = 3,14 \times (3,5\text{cm})^2 \times 5,4\text{cm}$ ✓ ✓
 $= 207,78\text{cm}^3$ ✓ ✓

2.4 A top view of the bottom of the cooler box
with the block of ice in it would look like
this:

✓ ✓
The height of the cooler box where there is
no ice is 30cm. This means you can fit in
 $(30\text{cm} \div 5,4\text{cm}) = 5,55$ tubs ✓

This means that there can be 5 layers of ice-
creams.

\therefore Number of ice-creams in cooler box
where there is no ice $= 26 \times 5 = 130$ tubs ✓

The height of the cooler box where there is
ice is $30\text{cm} - 20\text{cm} = 10\text{cm}$. This means you
can fit in $(10\text{cm} \div 5,4\text{cm}) = 1,9$ tubs
This means that there can only be 1 layer on
top of the ice. ✓

\therefore Number of ice-creams in cooler box
where there is ice $= 6 \times 1 = 6$ tubs

Total number of tubs $= 136$ tubs. ✓

3.1 The earliest bus is at 06:10 ✓ so he should
leave his home not later than 05:55. ✓ He
takes 10 minutes to walk to the station so he
will get there at about 06:05. ✓ He will
catch the bus at 06:10 and arrive at Parktown
at 06:49. ✓ He takes about 15 minutes to
walk to his bicycle so he will arrive at about
07:04. ✓

3.2 He gets on very near to the beginning of the
bus route and gets off at Victoria/Oxford
which means he is zone 4 which will cost
him R8,30. ✓ ✓ ✓

3.3 The last bus of the day is at 17:36. ✓ He
must pack away before 17:20 ✓ so that he
has at least 15 minutes to walk to the station.
He will arrive at Southgate Centre at 18:25
✓ and he takes 10 minutes to walk home.
This means he will arrive at about 18:35. ✓

4.1.1 149 ✓

4.1.2 142 ✓

4.1.3 149 ✓

4.2 Some people did not fill in their gender. ✓ 1

4.3 It appears as if there were a lot more males
buying ice-creams than females whereas in
reality there was a difference of only 4. ✓ ✓
This impression is created by starting the
horizontal axis at 67 and not at zero. ✓ ✓ By 4

- doing this the graph emphasises the difference between the males and females.
- 4.4 There are only 4 people in the sample who are older than 35 years of age. ✓ This is too small a number in this age group to test the preference of flavours for the whole population of 35 years of age. ✓
- 4.5 Gained: It is easy to compare the males and females when looking at a particular flavour. For example: it is easy to see that more males than females like Licorice flavoured ice-cream. ✓
- Lost: You cannot compare the males with the other males i.e. you can't see which of the flavours the males like best. ✓

4.6

	13-17	18-24	25-34	35-49
Choc	20	34	6	3
Straw	6	14	5	1

✓ ✓ ✓ ✓

- ✓ labels on graph
✓ ✓ ✓ graph correct
- 4.7 Advantage of "Answer by age" using percentage: You can compare the different flavours within an age group even although there are a different number of people in each age group i.e the 25-34 age group like strawberry the most out of all the age-groups. ✓
- Disadvantage: You can't compare within the same age group. ✓
- Advantage of "Answer by age" using actual numbers: You can compare the different age groups. i.e you can see that strawberry is the most popular of all the age groups. ✓
- Disadvantage: You can't compare within the same flavour as the number of participants in each age group differs. ✓
- 4.8 Licorice: $(12 \div 149)\% \times 20 = 1,6$ ✓
 Bubblegum: $(32 \div 149)\% \times 20 \approx 4$ ✓
 Vanilla: $(16 \div 149)\% \times 20 \approx 2$ ✓
 Strawberry: $(26 \div 149)\% \times 20 \approx 3$ ✓
 Chocolate: $(63 \div 149)\% \times 20 = 8,5$ ✓
 Because chocolate is the most popular flavour it would be sensible to rather buy 9 boxes of chocolate and only 1 box of licorice. ✓

- 5.1 Number of kilograms of ice cream:

$$45 \times 0,200\text{kg} = 9\text{kg} \checkmark$$

Number of kilograms of dry-ice:

$$\frac{9}{4} + 1\frac{1}{2} = 3\frac{3}{4}\text{kg} \checkmark \checkmark$$

He will need:

$$3\frac{3}{4}\text{kg} \times 2 = 7\frac{1}{2}\text{ half-kilograms of dry-ice} \checkmark \checkmark$$

Thabo must buy 8 half-kilograms of dry-ice ✓

- 5.2 Number of kilograms of dry-ice:

$$7 \div 2 = 3\frac{1}{2}\text{kg} \checkmark$$

Number of kilograms of food:

$$\frac{x}{5} + \frac{1}{2} = 3\frac{1}{2}\text{kg}$$

$$x = 3 \times 5 = 15\text{kg} \checkmark \checkmark$$

Number of ice creams:

$$15\text{kg} \div 0,2\text{kg} = 75\text{ ice creams} \checkmark$$

They get a tank of petrol worth R420.
Can have an extra driver for the car.
The driver can be young.
There is extra damage control. 2

Grade12 Mathematical Literacy: Memorandum Paper 2

1.1	$R4\ 500 + R7\ 985,13 = R12\ 485,13$ ✓ ✓ ✓	3	
1.2	Monthly salary : $R97\ 575,00 \div 12$ = $R8\ 131,25$ ✓ ✓ UIF = 1% of $R8\ 131,25$ = $R81,31$ ✓ ✓ OR Yearly UIF: 1% of $R97\ 575,00$ = $R975,75$ ✓ ✓ Monthly UIF = $R975,75 \div 12$ = $R81,31$ ✓ ✓	4	
1.3	Tax paid per month: $R12\ 485,13 \div 12$ = $R1\ 040,43$ ✓ Take home salary: = $R8\ 131,25 - (R1\ 040,43 + R81,31)$ ✓ = $R7\ 009,51$ ✓	3	
1.4	Jan 2006 Food: $26,5\% \times R7\ 009,51$ ✓ = $R1\ 858$ ✓ Jan 2006 Clothing etc: $5\% \times R7\ 009,51$ ✓ = $R350$ ✓ Jan 2006 Housing etc: $18,9\% \times R7\ 009,51$ ✓ = $R1\ 325$ ✓ Jan 2006 Transport: $9,7\% \times R7\ 009,51$ ✓ = $R680$ ✓	8	
1.5	a Jan 2007 Food: $(100 + 9,3)\% \times R1\ 858$ ✓ = $R2\ 031$ ✓ b Jan 2007 Clothing etc: $(100 - 10,9)\% \times R350$ ✓ = $R312$ ✓ c Jan 2007 Housing etc: $(100 + 9,2)\% \times R1\ 325$ ✓ = $R1\ 447$ ✓ d Jan 2007 Transport: $(100 + 6,8)\% \times R680$ ✓ = $R726$ ✓ e Total = $R\ 7\ 583$ ✓ ✓	10	
1.6	Total expenditure for January 2007: = $R7\ 541$ ✓ % change = $\frac{7\ 538 - 7\ 003}{7\ 003}$ as a % ✓ ✓ = $7,64\%$ ✓	4	
1.7	Gross salary after increase: $(100 + 5)\% \times R97\ 575,00$ ✓ ✓ = $R102\ 453,75$ ✓	3	
1.8	2007 tax: = $18\ 000 + 25\%$ of $(R102\ 453,75 - R100\ 000) - R7\ 200$ ✓ ✓ ✓ = $R11\ 413,44$ per year ✓ 2007 UIF: = 1% of $R102\ 453,75$ = $R1\ 024,54$ per year ✓	7	
	Take home salary: = $R102\ 453,75 - (R11\ 413,44 + R1\ 024,54)$ ✓ = $R90\ 015,78$ per year = $R90\ 015,78 \div 12$ per month = $R7\ 501,31$ ✓		
1.9	% increase in take home salary: $\frac{7\ 501,31 - 7\ 009,51}{7\ 009,51}$ as a % ✓ ✓ = $7,02\%$ ✓ % tax in 2006 = $\frac{12\ 485,13}{97\ 575}$ as a % ✓ = $12,8\%$ ✓ % tax in 2007 = $\frac{11\ 413,44}{102\ 453,75}$ as a % ✓ = $11,1\%$ ✓ Luca's tax decreased by 1,7% from 2006 to 2007 This meant that besides the increase in gross salary of 5% she was also paying less tax in 2007. This meant that her take home salary was more than 5%. ✓	8	
1.10	Anticipated expenses = $R\ 7\ 583$ ✓ Luca will be earning $R7\ 501,31$ which falls short by about $R50$. ✓ This means that she will have to look at ways to cut down on her expenses if she does not want to overspend. ✓	3	
2.1	2005: $\approx 19\%$ ✓ 2006: $\approx 18\%$ ✓ 2007: $\approx 16\%$ ✓ 2008: $\approx 15\%$ ✓	4	
2.2	2005: $\approx R230\ 000$ ✓ 2006: $\approx R260\ 000$ ✓ 2007: $\approx R330\ 000$ ✓ 2008: $\approx R370\ 000$ ✓	4	
2.3	Effective interest rate = 10% ✓ 10% of $R100\ 000 = R10\ 000$ ✓	2	
2.4	The effective interest rate has decreased over the period 2005 to 2008. ✓ This is seen by the graph of 2006 being below the 2005 graph. Similarly for the 2007 and 2008 graphs. It can also be seen in the answers to 2.1 and 2.2 ✓ ✓ ✓	4	
3.1	This means that 75% of the class scored a lower mark than he did and 25% of the class scored a mark higher than he did. ✓ ✓	2	
3.2	Total number of participants = 20. ✓ Each quartile has $\frac{1}{4}$ of $20 = 5$ participants. $\therefore 88$ falls in the fourth quartile. ✓	2	
3.3.1	75 percentile ✓ ✓	2	
3.3.2	$17,2$ ✓ ✓	2	
3.3.3	$13,2 < BMI < 19,4$ ✓ ✓ ✓ ✓	4	

3.4.1	$BMI = \frac{30}{1,2^2} = 20,8$ ✓ ✓ ✓ Falls above the 95 percentile and is therefore overweight. ✓ ✓		5.1	From Friday 18:10 to Saturday 06:40 by train which is $17\frac{1}{2}$ hours. ✓	
3.4.2	$BMI = 20,6$ ✓ ✓ $20,6 = \frac{w}{1,65^2}$ ✓ $20,6 \times 1,65^2 = w$ ✓ $w = 56 \text{ kg}$ ✓	5		It takes ≈ 1 hour by taxi \therefore trip takes approximately $18\frac{1}{2}$ hours. ✓	2
4.1.1	$5 + 6 + 9 + 10 + 8 + 5$ ✓ ✓ ✓ = 43% of fatalities occur between 17h00 and 22h00 ✓	5	5.2	R220 ✓	1
4.1.2	There would be many more cars on the road because people would be traveling to work and school at this time of the day. ✓ ✓ ✓	4	5.3	Moz Airlines: Cost R1 485 and time 1 hour ✓ SAA: Cost R1 450 and time 1 hour and 5 minutes ✓ Bus: Cost R220 and time $10\frac{1}{2}$ hours ✓ Train and taxi: Cost R80 and time $18\frac{1}{2}$ hours. ✓	
4.1.3	Between 17h00 and 22h00 ✓ ✓ The graph shows a peak between those times. ✓ ✓	3		The least expensive option takes the most time to get there and you travel through the night. It also means a change of transport along the way which is inconvenient. ✓	
4.2.1	That data was unavailable.	4		The two most expensive options (flying) take the least time to get there and is the most convenient as Luka would get a good night's sleep at home. ✓	6
4.2.2	(a) 9 981 in 40 400 000. ✓ $\therefore 9\,981 \div 404$ ✓ = 24,71 per 100 000. ✓ ✓	2	5.4	See completed diagram below	6
	(b) 10 523 in 42 640 000. ✓ $\therefore 10\,523 \div 426,4$ ✓ = 24,68 per 100 000. ✓ ✓	8	5.5	Take Mozambique airlines departing at 19:10 on Friday night and arriving at 20:10. ✓ ✓ Spend Friday and Saturday night in Mozambique. (2 nights) ✓ Return by bus on Sunday departing at 19h00 and arriving at 03h55. ✓ ✓ This would maximise her time in Maputo and still have her at work on time on Monday morning. ✓ Costs = R1 485 + R220 ✓ ✓ = R1 705 which is within her budget. ✓	9
4.3.1	$10\,523 - 9\,981 = 542$ ✓ ✓	4			
4.3.2	$12\,727 - 11\,201 = 1\,526$ ✓ ✓	4			
4.4.1	$24,68 - 24,71 = -3,03$ ✓	4			
4.4.2	$27,32 - 25,31 = 2,01$ ✓ ✓	4			
4.5	The Minister would use the graph of fatalities per 100 000 as it shows a steady decline in fatalities per 100 000 from 1990 to 1998. thereafter there has been a slow rate of increase in fatalities per 100 000. It shows that even though the number of actual deaths has increased, the ratio of deaths to population size has decreased. ✓ ✓ ✓ Somebody trying to contradict the minister would use the actual fatalities graph as it shows a steady increase in fatalities since 1993. It does not however indicate how the population has increased. ✓ ✓ ✓	6			
4.6	Fatalities per 100 000. This statistic gives you a ratio of deaths per 100 000 of the population and therefore gives you an idea of the likelihood of you dying in a car crash no matter how large or small the population is. If you are only given the actual fatalities you are unable to compare it with the population size. A large number of fatalities could be a small percentage of a very large population or it could be a big percentage of a small population. It does not give you an idea of the risk factor. ✓ ✓ ✓ ✓	4
